

Bluetooth Pairing Procedure

Level A Music System

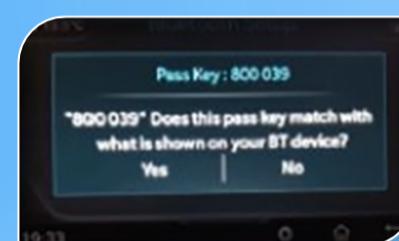

1) Turn ON Bluetooth and ensure Visibility is ON in music system.

2) Search in your mobile for Bluetooth Devices and select "ConnectNext."

3) Confirm the Pass keys on mobile and on the system.

Level B Music System (Touchscreen)

1) Turn ON Bluetooth and ensure Visibility is ON in your mobile.

2) Go to the phone set up menu in system and click on "Pair a New Device".

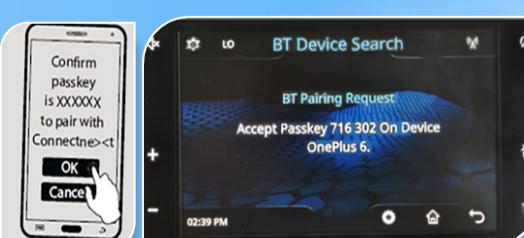

3) The system starts searching and shows all available mobile devices.

4) Select the mobile device which needs to be paired by touching.

5) Confirm the passkey on mobile and system.

6) The system will show the paired device for Phone and Media.

Do's and Dont's

1) Set music system volumes such as to allow you to hear outside traffic and other warnings.

2) If vehicle is parked under direct sunlight for prolonged duration, let the car cool down before use to avoid damages due to high heat.

3) Do not open the infotainment system as incorrect handling can damage the system. Further, warranty is void, if seal is broken.

4) Do not apply sticky or strong alcohol based spray, lotion or liquid on the infotainment system while cleaning. It may cause permanent damage to the system button functions, knob operations or the display screen. It may also lead to the deterioration of the system paint.

5) Avoid after market fitments such as external amplifiers, woofers, speakers etc. Unauthorized interconnections can result in the malfunctioning of the infotainment system.

6) To use Android Auto NaviMaps feature it is recommend to use USB cable which is received along with mobile phone OR use branded make cable for better connectivity.

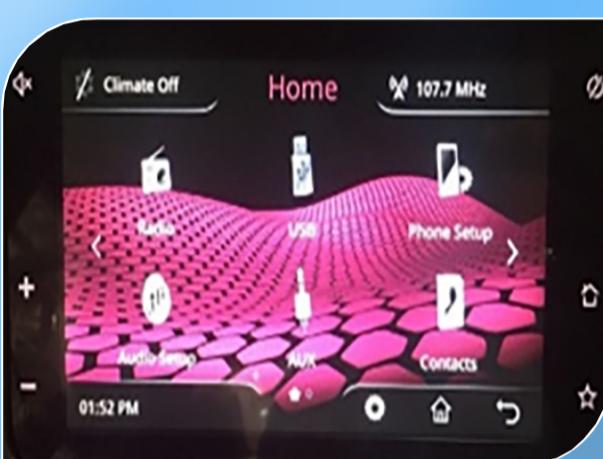

Kindly refer the link to check your phone's compatibility with infotainment system:

Harman Infotainment Guide

LEVEL B 7" Touchscreen (XZ+)

LEVEL B 5" Touchscreen (Tiago NRG)

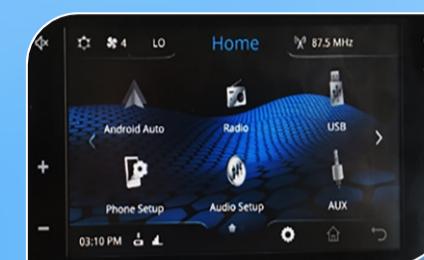

LEVEL A (XT,XTA,XZ,XZA)

Launching Android Auto

1

HU Home screen: Android Auto symbol is disabled by default and enabled only after connecting HU to phone with android auto app.

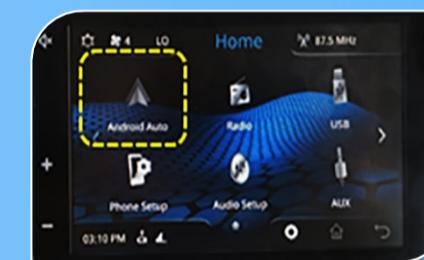

2

Connecting phone to HU through USB cable.

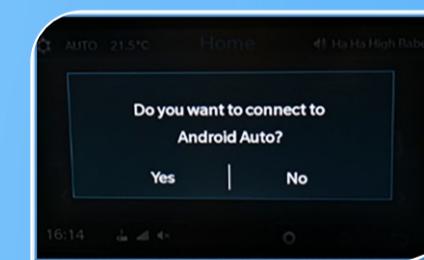

3

Android auto icon is enabled. Now click on this icon.

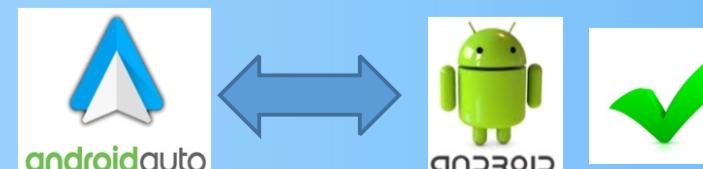

4

Click on yes to connect to android auto app.

5

Android auto home screen displayed on HU.

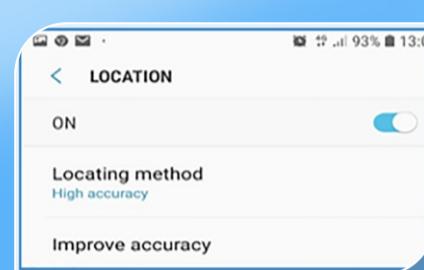

6

Engage park brake while connecting Android Auto first time with infotainment system.

7

Ensure Location is enabled in Phone settings.

If Android Auto used to work earlier properly or facing disconnection issue now then replacing your USB cable, will likely fix this problem.
