

XPRES More, Earn More

Tata Motors Passenger Vehicles expands its XPRES Portfolio with Petrol and Twin-Cylinder CNG Variants

Launched at an introductory price of ₹5.59 lakh for the Petrol variant and ₹6.59 lakh for the CNG variant

Key Highlights:

- Best in class fleet sedan price in CNG and Petrol
- Low cost of ownership, with extendable warranty up to 5 years or 1,80,000 km (whichever is earlier)
- Low cost of Maintenance at ₹0.47/km
- First-in-segment 70L (water capacity) twin-cylinder CNG fuel tank (highest capacity in the segment enabling maximum travel range)
- More Space & Comfort
 - First-in-segment twin-cylinder CNG technology enabling uncompromised boot space in CNG variant
 - Largest boot space in the Petrol Fleet sedan segment: 419 L
- Introducing exclusive fleet-focused dealerships across select cities, ensuring dedicated sales and service support for fleet customers

Mumbai, January 23, 2026: Tata Motors Passenger Vehicles (TMPV), one of India's leading automobile manufacturers, today launched the XPRES in Petrol and CNG, expanding its purpose-built fleet portfolio beyond the much-appreciated XPRES EV, with an aim to address a larger market. The move reinforces TMPV's focus on its multi-powertrain strategy, delivering customised, high-uptime mobility solutions for professional fleet operators across India. Bookings for the XPRES Petrol and CNG are now open across authorised fleet dealerships, with best-in-class fleet sedan prices starting at ₹5.59 lakh for the Petrol variant and ₹6.59 lakh for the CNG variant, ex-showroom Delhi.

Powered by TMPV's proven 1.2L Revotron engine and offered with a manual transmission, the XPRES Petrol and CNG variants are engineered for reliability, durability and sustained fleet usage. Designed specifically for professional mobility, the XPRES CNG features a first-in-segment 70L (water capacity) twin-cylinder CNG fuel tank (highest capacity in the segment), enabling customers to travel long range without worrying about refuelling the tank. Crucially, the intelligent twin-cylinder packaging also ensures best-in-segment, uncompromised boot space, solving one of the most persistent pain points for fleet operators by reducing luggage-related booking losses and unlocking the full revenue potential of sedan fleets. Furthermore, the petrol variant boasts of the largest boot space of 419L in the petrol fleet sedan segment.

Speaking about enhancing the Tata XPRES line up, **Mr. Vivek Srivatsa, Chief Commercial Officer, Tata Passenger Electric Mobility Ltd.**, said, *"Tata XPRES was created to address the real operating challenges faced by fleet customers, including passengers and owners. Responding to the needs of our fleet customers, we are elated to introduce the first-in-segment 70-litre twin-cylinder CNG variant with best-in-segment usable boot space, alongside a petrol variant with the largest boot space. Built on our proven 1.2-litre Revotron powertrain and supported by long-term warranty, tailored finance and dedicated fleet dealerships, Tata XPRES fleet with its complete range of electric and ICE powertrains will offer a complete, future-ready mobility platform to our customers, in turn expanding our market share across India's commercial mobility landscape."*

To further enhance peace of mind for operators, the XPRES ICE fleet will come with a standard warranty of 3 years or 1,00,000 km (whichever is earlier), extendable up to 5 years or 1,80,000 km (whichever is earlier). Additionally at a low maintenance cost of ₹0.47/km, along with attractive finance solutions tailored for fleet customers, the XPRES in Petrol and CNG is undoubtedly the best buy in this segment.

Adding to the entire package, TMPV has also established exclusive, fleet-focused dealerships across select cities, offering dedicated sales and service infrastructure designed to meet the specific needs of commercial customers. This ensures faster turnaround, higher vehicle availability and consistent support across the vehicle lifecycle. With this expanded portfolio, Tata XPRES fleet (Petrol, CNG and EV) opens up significant growth opportunities across high-volume, high-utilisation segments including airport transfers, cab aggregators, intercity operations, employee transportation, rent-a-car services and tourist taxi operators.
