**SHIFT BY WIRE TECHNOLOGY**

The Altroz DCA is equipped with Shift by Wire Technology which eliminates the use of shift cables. The electronic shifting expedites the transition between gear shifts to ~ 250 milliseconds per shift. This enhances gear shifting experience to dynamic and responsive.

**SELF-HEALING MECHANISM**

Dusty roads put an additional risk on a conventional automatic transmission that hinders performance should dust build up on the mechanism. The Altroz DCA gear lever is a step further than the standard manual option with a Self-Healing Mechanism that activates dust and debris, preventing it from affecting your driving experience.

**AUTO PARK LOCK**

The Auto Park Lock sits at the list of reasons why the Altroz is noted a Safe Hatchback. The feature automatically locks the gear when the driver leaves the vehicle, ensuring no shift occurs, effectively eliminating the risk of vehicle movement.

**Transmission Alert**

Shift to Park (P) to Exit

**DRIVER ASSIST FEATURES**

The TFT instrument cluster displays the position of the gear lever P, R, N, D, and if your gear never leaves the road as an additional layer of safety for the passengers. Drive in the city, the instrument cluster also triggers a message to check out for a U-turn move before exiting the vehicle.
#THEGOLDSTANDARD OF AUTOMATICS

The Altoz DCA (Dual Clutch Automatic) is a Dual Clutch Transmission purpose-built and perfected on a brand new car from India. At the heart of the Altoz beats an innovative technology, engineered on the foundation of 45 years. The Altoz DCA will take on every Indian road and every weather, while also delivering superior driving style and a great driving experience. The Altoz DCA is truly a MADE FOR INDIA example of how to integrate the latest technology into the greatest driving experience.

INDIANA

The planetary gear system is built on the core mechanisms of an innovative technology. The cutting-edge technology results in a 30% reduction in moving parts, giving you a better shifting experience in a compact package.

MACHINES LEARNING

India is home to a diverse population with different driving styles, and a path with narrow maneuvering conditions. The Altoz DCA learns your driving style by utilizing machine learning algorithms that continuously improves performance by adapting the transmission to suit the terrain.

PERFECTED FOR THE SCORCHING HEAT OF THE THAR

India is a unique place which poses unique problems for every conventional automatic transmission. The extreme weather conditions and altitude, shade and sunlight are unkindly with India. Altoz DCA’s Wet Clutch with Active cooling technology maintains oil temperature at 100 times per second and adapts to improve your drive performance.
