Dear Customer,

Welcome to the CONNECTNEXT® Infotainment System User's Manual. The infotainment system in your vehicle provides you with state of the art in-car entertainment to enhance your driving experience.

Before using the infotainment system for the first time, please ensure that all users read this manual carefully. The manual will familiarize you with the infotainment system of your car and its functionalities. It also contains instructions on how to use the infotainment system in a safe and effective manner.

We insist that all service and maintenance of the infotainment system of your car must be done only at authorized TATA service centers. Incorrect installation or servicing can cause permanent damage to the system. If you have any further questions about the infotainment system, please get in touch with the nearest Tata Dealership. We will be happy to answer your queries and value your feedback.

We wish you a safe and connected drive!

ABOUT THIS MANUAL

This guide introduces you to the CONNECTNEXT® Infotainment system and details its controls, options and operations.

In addition, the guide contains:

- Illustrations to provide orientations or identification of various options like buttons and menus.
- Cautions related to a topic such as Danger alerts, Security alerts, Warning statements, Caution notices and General notes.
- A list of abbreviations used in this guide with their explanation.
- An alphabetical index for quick identification of required topics.

CONVENTIONS

⚠️ **DANGER:**
Text that indicates to actions that might cause harm to personnel.

⚠️ **SECURITY ALERT:**
Text that indicates to actions which increases the potential for unauthorized access.

⚠️ **WARNING:**
Text that indicates to actions that might cause harm to the equipment.

⚠️ **CAUTION:**
Text that call for attention.

⚠️ **NOTE:**
Text that provides some additional important information, which when ignored can cause inconvenience or tips that will help you in using the equipment.
SAFETY GUIDELINES

DANGER:
The infotainment system must be used in a way that allows you to drive the vehicle safely at all times. Failure to do so may result in an accident involving serious injury or death.

Keep this manual in the vehicle, so it will be handy for you to refer, when needed. If you sell or lend the vehicle, make sure this manual is available in the vehicle along with other standard booklets.

Please read and follow the safety guidelines listed in this section to avoid injury or property damage.

GENERAL SAFETY GUIDELINES

WARNING:
The infotainment system is a sophisticated electronic device. Do not allow improper access of the infotainment system.

DANGER:
Permanent hearing loss may occur if you play your music at loud volumes for prolonged duration. Exercise caution when setting the volume of your infotainment system.

DANGER:
Exposure of the infotainment system to water or excessive moisture can cause electric shocks, fire, or other damages.
SAFETY GUIDELINES WHILE DRIVING

⚠️ DANGER:
Glance at the screen of the infotainment system only when necessary and safe to do so. If prolonged viewing of the screen is necessary, park in a safe location and engage the hand brake.

⚠️ DANGER:
Make certain that the volume level of the infotainment system is set to a level that allows you to hear outside traffic and other warnings.

SYSTEM CARE AND MAINTENANCE

Exert at most care while handling the infotainment system as partial or complete loss of the infotainment system functions due to intentional misuse is not covered under warranty. Some guidance for using or maintaining the system are listed below:

⚠️ WARNING:
Parking under direct sunlight for prolonged duration can result in high temperatures inside your car, which can damage your infotainment system, if used. So, before using the system let the car interior to cool down.

⚠️ WARNING:
Do not open the infotainment system as incorrect handling can damage the system. Further, warranty is void, if seal is broken.

⚠️ WARNING:
Do not replace the vehicle speakers or fit additional speakers with aftermarket speakers. It may lead to the malfunctioning or even damage of the infotainment system.
SAFETY GUIDELINES

⚠️ WARNING:
Do not apply sticky or strong alcohol based spray, lotion or liquid on the infotainment system while cleaning the vehicle dashboard. This may cause permanent damage to the system button functions, knob operations or the display screen. It may also lead to the deterioration of the system paint.

⚠️ WARNING:
Avoid addition of any accessories such as external amplifiers, which will lead to the modification of the standard factory wiring connections. As such unauthorized interconnections, can result in the malfunctioning of the infotainment system. Always contact the Tata dealer for the changes to the vehicle or system.

⚠️ WARNING:
Usage of paint or color on the infotainment system can make the moving parts sticky and stop them from functioning correctly.

⚠️ WARNING:
Ensure that any liquid does not enter the infotainment system, as it will lead to the failure of radio. The warranty of the system will be void, if liquid ingress marks are observed inside the system.

⚠️ WARNING:
Do not use excessive force while handling the infotainment system, USB slot, AUX-In slot and so on. It might cause damage to the system or component.
WARRANTY CLAUSES

The warranty clauses applicable to the infotainment system are listed below:

1. Warranty is applicable in India only.
2. Warranty for the product is against defective materials and manufacturing faults for 36 months / 36,000 km (whichever comes earlier) from the date of the first sale of vehicle.
3. Display and touch panel, if applicable to your system, are covered for 12 months / 36,000 km (whichever comes earlier) from the date of the first sale of vehicle.
4. Warranty is expressly not applicable under the following conditions:
   - Where the product has been dismantled, repaired, altered, modified or damaged due to user negligence and misuse.
   - The serial number of the product been removed, defaced or altered.
   - Warranty void sticker is removed or tampered
   - Improper usage such as wrong electrical supply / voltage setting causing damage to the equipment.
   - Tampered or serviced or repaired by any agency not authorized by Tata Motors Limited.
INTRODUCTION

The CONNECTNEXT® infotainment system provides you with a bundle of high-end functionalities to:

- Manage in-vehicle entertainment capabilities
- Handle certain vehicle feature controls
- View information about some vehicle features

Key features of the infotainment system include:

- 90mX40mm DSTN Dot Matrix Screen
- 4 Channel Audio
- AM and FM Tuner Bands with 6 station memories on each band
- Speed Dependent Volume Control
- Display OFF feature for distraction free night drive
- USB, iPod, Aux and Bluetooth Audio media support
- Simultaneous pairing with multiple Phone handsets (up to 10 devices) through Bluetooth for Phone and Music supports like Phone book download & Audio streaming
- Support for Turn-By-Turn (TBT) Navigation using the mobile application supported by MapmyIndia maps
- Integrated with vehicle components like FATC and Park Assist System and displays related information
- Vehicle feature control support like handling vehicle door locking and Approach lights
- Infotainment system control from Steering Wheel and IR Remote Control.

NOTE:

Some of the vehicle features like park assist system, Steering Wheel Controls (SWC), Infra Red (IR) Remote Control, locking, and lighting are not standard in every vehicle variant. Features that are unavailable in the vehicle cannot be controlled using the infotainment system. Please refer to the Owner’s Manual of your vehicle or check with your vehicle dealer to confirm the list of features available in your vehicle.
The control elements, buttons and knobs, that are available on the infotainment system allows you to control the infotainment system. It provides you with quick and easy access to the commonly used functions and options of the infotainment system.

| 19    | RADIO button     | - **SP & LP:**
|       |                  |   - Plays Radio in the last tuner band (FM/AM station).
|       |                  |   - **Radio:** Displays the various tuner bands, FM1, FM2, FM3, AM1 and AM2. When the Radio button is pressed again, the infotainment system displays the stored FM/AM stations. |
| 20    | MEDIA button     | - **SP & LP:**
|       |                  |   - Plays last active media source. |
|       |                  |   - **Radio:** Plays previous valid media source/default media source. |
|       |                  |   - **Media Types:** Displays the different types of media source i.e. USB, iPod and AUX. |
OTHER MODES OF CONTROL

In addition to the control elements on the infotainment system, the system can also be controlled from the:

- Steering Wheel controls
- Infra-Red (IR) Remote controls

Steering wheel control elements provide you the flexibility of controlling your infotainment system even while you are driving without distracting your attention.

Using the IR Remote control elements, people in the back seat can also control the infotainment system without asking the people in the front seat.

⚠️ NOTE:

The battery inside the IR remote control is not covered under warranty.

⚠️ NOTE:

Voice recognition feature is unavailable for this variant of the vehicle.

INTRODUCTION

SYSTEM USAGE

The menus and submenus in the CONNECTNEXT® infotainment system helps you to easily browse and access the various features and functions of the system.

CONNECTNEXT® Menu Structure

Access to any function/feature begins from the Main Menu. The main menu of the CONNECTNEXT® infotainment system has 5 menu options:

- Radio
- Media
- Phone
- Setup
- Navigation

Depending on the functionality, the infotainment system provides multiple levels of submenus.

Accessing the Main Menu

You can view the Main Menu and its options by pressing the button from any screen of the infotainment system.
SYSTEM USAGE

Navigating Between On-Screen Objects

The on-screen objects of the infotainment system like, menus, buttons and so on can be accessed using the knob.

Selecting an On-Screen Object

You can select an on-screen object to:

- display the corresponding submenu of the selected menu.
- display a popup with information/message.
- activate the function corresponding to the selected button.
- select or deselect a check box or an option button.

Using Menu/Volume Rotary Knob:

1. Rotate the knob clock-wise or anti-clock-wise to navigate to the required on-screen object like menu option or button.

The system highlights the object that is currently in focus.

NOTE:

When the Volume Rotary Knob is rotated, the volume is increased or decreased.
2. Press the knob to select the required on-screen object.

NOTE: When the knob is pressed, the system is set to Media Off/On mode. If the system is in One Hour System Switched ON Mode, pressing the knob will Switch Off the system. Refer to “System ON/OFF”, section, for more information.

Scrolling Through a Menu List

When there are many menu options, the system:

- displays a scroll bar beside the options.

Using Menu Rotary Knob:

1. Rotate the knob clock-wise or anti-clockwise to scroll through the menu list.

Modifying the Value in a Range

Using Menu Rotary Knob:
SYSTEM USAGE

1. Use the knob to highlight the required on-screen object, if multiple on-screen objects are available.
2. Rotate the knob clock-wise or anti-clock-wise to increase or decrease the value.

Going to the Parent Menu from a Submenu

1. Press the button on the infotainment system to display the parent menu of the currently active submenu.

Identifying the Currently Active Menu from the Display Screen

The display screen of the infotainment system has 3 information areas:

1. **Header Area:** Displays menu/submenu option name, bluetooth status (only if bluetooth device connected to the infotainment system), battery power, connectivity and signal strength and time.
2. **Active Area:** Displays submenu options, information or progress of the currently selected menu function/feature.
3. **Footer Area:** Displays CONNECTNEXT®.

HANDLING POPUPS

The infotainment system displays popups to:
INTRODUCTION

- indicate progress of an activity - will disappear once the activity in progress ends.
- display important messages regarding system or the currently active feature - will disappear automatically after 5 seconds.
- prompt you to confirm an action before performing it -
  - will not disappear until an action is taken.
  - will automatically disappear, if no action is taken within a predefined time period.
GETTING STARTED

To use the CONNECTNEXT® infotainment system, you must first switch it ON.

When the vehicle ignition is switched ON and the infotainment system is switched ON, the system will be in the System Switched ON (Active) Mode.

SYSTEM ON/OFF

1. To switch the infotainment system ON/OFF, press the knob.

**NOTE:**

When the vehicle ignition is ON and if you press the knob to switch OFF the system, media source or radio that is currently played will be stopped and the system displays the system clock.

When the vehicle ignition is switched ON, the system is automatically switched ON and the audio source that was active before system switch OFF is reactivated. Even if the system was switched OFF using the knob, the system will be automatically switched ON, after vehicle ignition switch ON.

If the vehicle ignition is switched OFF and the key is removed, the system is switched OFF. The system will now be in the System Switched OFF Mode and no functions will be available.
GETTING STARTED

When the vehicle ignition and the infotainment system is switched ON and you press the knob, the system will be in the Media Switched OFF Mode.

All entertainment functions (Media/ Radio) will be unavailable in this mode. Only Phone and display functions like Setup, HVAC and so on will be active. By default, the system will display the time and date on the screen.

When the vehicle ignition is switched OFF, you can switch ON the infotainment system by pressing the knob and the system will be available for the next one hour. This is called the One Hour System Switched ON Mode.

After an hour, the system will be automatically switched OFF. Only Phone and entertainment functions (Media/Radio) will be available in this mode. If an active phone call is in progress, the system will not be switched OFF after an hour. The system will be switched OFF, after the active call ends.
MANAGE GENERAL SETTINGS

To handle the general CONNECTNEXT® infotainment system settings like, date and time:

1. Press the SETUP button. The system displays the Setup menu options.
2. Navigate to and select the General Setup option. The system displays the various options for setting the basic system parameters.

\[\text{NOTE:} \]

The language used in the infotainment system is English. Other languages are not supported.

To set the system date:

1. In the General Setup options, navigate to and select the Set Date option. The system displays the Date screen.
2. In the Set Date screen, highlight the day (DD) field and select the required day value.
3. Highlight the month (MM) field and select the required month value.
4. Highlight the year (YY) field and select the required year value.

Figure 8: General Setup Screen
5. When the required date is selected, select the SET button. The selected date is set as the system date.

3. Highlight the minutes field and select the required minute value.
4. Highlight the time period (AM/PM) field, select the required time period value.

**NOTE:**
The Time Period option will be available only if the ‘Use 24 Hour Format’ option is not set.
5. When the required time is selected, select the SET button. The selected time is set as the system time.

### Changing the Time Format

By default, the infotainment system clock displays time in 12 Hour format. To change it to the 24 Hour format:

1. In the General Setup options, navigate to and select the Use 24 Hour Format option. The check box beside the option is selected and the system clock displays time in the 24 hour format.

**NOTE:**
To change back to the 12 Hour format, clear the ‘Use 24 Hour Format’ check box.
MANAGE GENERAL SETTINGS

CLEARING PERSONAL DATA

The system allows you to clear your following personal data that are stored in the system:

- Paired and connected devices.
- Favorites contacts.

To clear the personal data stored in the system:

1. In the General Setup options, navigate to and select the Clear Personal Data option. The system displays a message popup indicating that all personal data stored on the system will be cleared.

2. In the message popup, select Yes to initiate the clearing action. The system clears all your personal data stored in its memory.

Figure 10: Clear Personal Data Message Popup
GETTING STARTED

CHANGE AUDIO SETTINGS

1. Press the SETUP button. The system displays the Setup menu options.
2. Scroll to and select the Audio Setup option. The system displays the various options for setting the audio parameters.

⚠️ NOTE:
The audio settings are common to all media sources.

⚠️ NOTE:
You can also view the Audio Setup options by pressing the button.

SETTING BASS, MIDDLE AND TREBLE VALUES

**Bass:** Increase or decrease the gain of low frequencies of the audio sources.

**Middle:** Increase or decrease the mid frequency of the audio sources.

**Treble:** Increase or decrease the high frequencies of the audio sources.

To set the bass, middle and/or treble values:

1. In the Audio Setup options, navigate to and select either Bass/Mid/Treble option. The system displays the Bass/Mid/Treble screen.
2. In the Bass/Mid/Treble screen, modify the field value by setting it to a new value in the range of -10 to +10.

![Figure 11: Bass Screen](image)

⚠️ NOTE:
The default values of Bass, Mid and Treble fields are 0.
CHANGE AUDIO SETTINGS

SETTING BALANCE AND FADER

**Balance:** Change this value to set the volume distribution between the left and right speakers of the vehicle.

**Fader:** Change this value to set the volume distribution between the front and rear speakers of the vehicle.

To set the balance and/or fader values:

1. In the **Audio Setup** options, navigate to and select the Balance/Fader option.
2. In the Balance/Fader screen, modify the field value by setting it to a new value in the range of -5 to +5.

![Figure 12: Audio Setup Screen - Balance, Fader Options](image)

**NOTE:**
The default values of Balance and Fader fields are 0.
SELECTING AN AUDIO PRESET/EQUALIZER

The infotainment system enables you to automatically change the audio settings depending on your favorite type of music. The preset options that are available to you are:

- Classic
- Pop
- Jazz
- Rock
- Flat
- Speech
- User

To change the audio settings to match your favorite type of music:

1. In the Audio Setup options, navigate to and select the Audio Preset option. The system displays the available audio preset options.
2. Scroll to and select your favorite option. The system automatically changes the audio settings depending on your selection.

NOTE:
The system displays the selected audio preset name beside the Audio Preset/Equalizer menu option.
CHANGE VOLUME SETTINGS

To handle the volume settings of the vehicle and the various features of the infotainment system:

1. Press the **SETUP** button. The system displays the Setup menu options.
2. Navigate to and select the **Volume Setup** option. The system displays the Volume Setup screen with various options for setting the volume of the vehicle or other system features.

**SETTING SPEED DEPENDENT VOLUME**

DEFINITION:

When the vehicle speed increases, the engine noise and surrounding noise like wind sound increases. The Speed Dependent Volume feature adjusts the audio volume of your system with the speed of the vehicle. This allows you to feel that the music is played at the same volume.

To set the speed dependent volume:

1. In the Volume screen, navigate to and select the **Speed Dependent Volume** option. The system displays the Speed Dependent Volume screen.
2. Modify the value of the option by setting it to a new value in the range of 0 to 5.
**NOTE:**
The default value of Speed Dependent Volume is, ‘3’ and when set to ‘0’ it corresponds to switching OFF the volume.

**SETTING PHONE AUDIO VOLUME**
This option sets the in-call volume of the connected phone.

To set the phone audio volume:

1. In the Volume screen, navigate to and select the **Phone Audio Volume** option. The system displays the Phone Audio Volume screen.
2. Modify the value of the option by setting it to a new value in the range of 0 to 30.

**NOTE:**
The default value of Phone Audio Volume is, ‘10’.

**DEFINITION:**
Startup volume is the audio volume at which your music will be played, when the system is switched ON with the vehicle ignition switch ON. At system startup, the lower of the system volume or startup volume will be used as the system audio volume.

To set the startup volume of the system:

1. In the Volume screen, navigate to and select the **Startup Volume** option. The system displays the Startup volume screen.
2. Modify the value of the option by setting it to a new value in the range of 5 to 20.

**NOTE:**
At system startup, if the system volume is higher than the startup volume, the lower of them will be set as the volume.
CHANGE VOLUME SETTINGS

NOTE:
The default value of Startup Volume is, '10'.

SETTING THE AUX-IN GAIN

The infotainment system acts as the amplifier for the audio output from the Auxiliary devices. You can set the audio output amplification level to Low, Mid (medium) or High.

To set the audio amplification level:

1. In the Volume screen, highlight the **Aux-In Gain** option. The system displays the available amplification level options.
2. Navigate to and select the required amplification level.
You can reset the infotainment system to the factory settings (i.e., default settings). This option is mainly useful when you are giving your vehicle to someone for temporary usage or when you are selling your vehicle.

When you reset the system to factory settings, the following changes will be made:

- All Setup settings like volume, audio, and so on, which were changed by the user will be restored to default.
- All Bluetooth devices will be disconnected and paired devices will be deleted.
- System Bluetooth name will be reset to Connectne>ct.
- All media source details stored in the system will be cleared.

To reset the system to factory default settings:

1. Press the *SETUP* button. The system displays the Setup menu options.
2. Navigate to and select the *Restore Factory Settings* option. The system initiates the restoring to factory default settings action. The media source/radio that is currently played will be stopped. Phone will be disconnected.

Once the reset is completed, the system prompts the user to switch OFF ignition and remove the key. The reset action is completed, when you insert the key again (after 10 seconds at least) and switch ON ignition.

**NOTE:**

You will not be able to initiate reset to factory default when the vehicle is in the One Hour System Switched ON Mode. However, if you switch OFF ignition while the reset is in progress, the system completes the reset operations in the One Hour System Switched ON Mode.
RESET TO FACTORY DEFAULT

Figure 14: Reset to Factory Defaults Message Popup
The CONNECTNEXT® infotainment system supports 3 FM radio bands (FM1, FM2 and FM3) and 2 AM radio bands (AM1 and AM2).

AM/FM Reception Limitations

Some AM/FM signal reception limitations of the system are listed below:

1. The AM/FM signal reception of the system does not cover long ranges. If your vehicle leaves the transmitter range, the sound quantity will become poor and there may be noise interferences.
2. The AM/FM signal cannot pass through hills and tall buildings. If vehicles enter such areas, the reception will be poor or there might be no reception at all.
3. The AM/FM signal reception quality might deteriorate with multi path effect, which results due to signal reflections from hills and tall buildings.

RADIO OPERATIONS

The system allows you to perform the following radio operations:

- Changing the radio band
- Tuning radio stations
- Handling presets
- AutoStore
- Scan

CHANGING THE RADIO BAND

To change the radio band:

1. In the Radio Screen, press the RADIO button. The system displays the various radio bands as menu options.
2. Select the required radio band. The system displays the details of the selected radio band.

Increasing/Decreasing Radio Volume

Rotate the knob clockwise/anti-clockwise to increase or decrease volume.

TUNING RADIO STATIONS

The infotainment system supports Manual tuning as well as Auto tuning radio stations.

Manually Tuning a Radio Station

To manually tune radio stations:

1. In the Radio screen, rotate the knob to tune to the next radio station by increasing or decreasing the frequency.

Auto Tuning a Radio Station

To auto tune radio stations:

1. In the Radio screen, press the button or the button. The system will automatically tune to the next available radio station by increasing or decreasing the frequency.
RADIO OPERATIONS

Stopping Auto Tuning

The system automatically stops the Auto Tuning action, when it reaches the next/previous receivable frequency or when the search is unsuccessful.

To stop the auto tuning action manually:

1. Press any button.

Scanning Radio Stations

To scan through the radio stations:

1. In the Radio screen, press the OPTIONS button. The system displays the radio options.
2. From the radio options, navigate to and select Scan. The system tunes to the next receivable station and plays it for 10 seconds. The scanning will be continued until stopped/cancelled.

\[\textbf{NOTE:}\]
To stop the scanning action manually, press any button.

\[\textbf{NOTE:}\]
To cancel the scanning action, press the knob.

\[\textbf{DEFINITION:}\]
You can scan through the available radio stations, when you are not sure of the station you want to hear. While scanning, the system plays each receivable station for 10 seconds. You must stop the scanning to continue hearing to a station.
HANDLING PRESETS

DEFINITION:
You can store a radio station in the system memory as a Preset, which will help in quick access of the station.

The infotainment system supports 6 presets per radio band.

Storing Presets

To store a tuned frequency (radio station) in a preset:

1. In the Radio screen, long press one of the corresponding preset (1 to 6) button.
RADIO OPERATIONS

Auto Storing Presets

DEFINITION:
The infotainment system allows you to automatically search and store available radio stations as presets. When initiated, the Auto Store feature priorities and stores the available stations in the presets depending on the strength of their signal i.e. the station with the highest signal strength will be stored in Preset 1.

To enable auto search and storing of presets:

1. In the Radio screen, press the OPTIONS button. The system displays the radio options.
2. From the radio options, navigate to and select Autostore. The system search for the available radio stations and when found stores the stations as the presets for the current radio band (AM/FM). When radio stations have been stored in all presets or if there are no more available stations, the system stops the automatic storing of presets action.

Playing a Preset

To play a radio station that was stored as a preset:

1. Press the RADIO button. The system displays the Radio screen.
2. Change to the required radio band, if not already displayed.
3. Press (short press) the required preset button (1 to 6).
NOTE:
You can also play a preset by browsing through the available presets using the and the Steering Wheel control elements or IR Remote control elements and pressing the knob to play it.

BROWSING THROUGH THE PRESETS
To browse through the preset list:

1. In the Radio screen, press the knob. The system displays the Presets screen with the list of presets. You can again use the knob to browse through the preset list and play a preset.

NOTE:
You can also browse through the presets by using the and the Steering Wheel control elements or IR Remote control elements.
The CONNECTNEXT® infotainment system supports the following media sources from which you can play music:

1. USB source
2. Bluetooth Audio source
3. iPod
4. Audio AUX-In source

The audio formats that are supported by the system are: .mp3 and .aac.

Table 5: Media Screen

For Bluetooth media source devices, the Media screen options will vary depending on the AVRCP version of the device. For devices with AVRCP 1.3 and above, the system displays the device name, the current active track name, and the play/pause icon. For devices with AVRCP below 1.3, the system only displays the device name and the play/pause icon. Please note that behavior on Bluetooth profiles can vary from device to device. Please check your phone user manual for more details.

PLAYING A MEDIA SOURCE

The infotainment system allows you to play a media source type by using anyone of the following ways:

- By inserting/connecting a media source device to the vehicle
- By selecting a media source type from the Media Sources menu options

CONNECTING TO A MEDIA SOURCE

The USB or Auxiliary media devices must be physically connected to the vehicle for the system to recognize and access them. Refer to your vehicle Owner’s Manual for information on where and how to connect the USB and Auxiliary devices to your vehicle.

NOTE:

USB devices with up to 32 GB of memory are supported by the system.

Bluetooth devices do not require any physical connection to the vehicle or system. Once you enable the Bluetooth feature in the media device and the system, both the devices can be connected and paired with each other.

NOTE:

While playing music tracks from Bluetooth devices, the volume must be set to maximum in the device.
PLAYING A MEDIA SOURCE

PLAYING MEDIA SOURCE AUTOMATICALLY

If a media source is inserted when the system is ON, the system immediately recognizes the source and starts reading the source. Once the reading is complete, the system automatically plays the music stored in the source.

![iPod Inserted](image)

Figure 19: Message Popup Indicating iPod Source Insertion

If the system is switched OFF, the system stops playing the source. When the system is switched ON again and if the source is still connected, the system starts playing music from where the source was stopped.

NOTE:

For good audio quality, music tracks recorded at 192 kbps or above are recommended for playing in the system. If tracks recorded at lower rates are played like around 128 kbps, there will be noticeable difference while listening.
PLAYING A MEDIA SOURCE

SELECTING A MEDIA SOURCE

When multiple media sources are connected to the infotainment system or to play a particular media source that was stopped earlier, you can select the required source from the list of available Media Sources.

To select the required media source:

1. Press the MEDIA button. The system displays the Media screen and plays the track that was played last, if the source is still connected.

   **NOTE:**
   
   In the Media screen, press the MEDIA button again. The system displays the Media Sources screen with the various media source options. In the Media Sources screen, select the required media source option.

Only sources that are currently connected to the infotainment system can be played when selected. The sources that have the check box beside their name are currently available for playing.

**NOTE:**

If you try to play a source that is not available, the system displays a message indicating the unavailability and prompts you to connect a device of the source first.

Figure 20: Media Sources Screen
MUSIC RELATED FUNCTIONS

The infotainment system allows you to perform the following music related operations:

- Play/pause music
- Increase/decrease/mute volume
- Repeat music track/folder
- Randomly play music tracks in a folder/media source
- Play next/previous music tracks
- Perform Fast Forward/Fast Rewind
- Play next/previous folder
- View information of a music track
- Browse through the music content

PAUSING/PLAYING MUSIC

Using the system, you can playback a maximum of 15000 music files.

To pause playing of music:

1. In the Media screen when a track is playing, press the button. The system pauses playing the music and the button changes to a Play icon.

Repeat the step to restart playing the music.

NOTE:

You can also use the button on the IR Remote Control to pause/play music.

NOTE:

If the system comes across a corrupt music track in your media source, the system tries to play the track and after 2 seconds automatically moves to the next music track in the media source.

HANDLING MUSIC VOLUME

The infotainment system allows you to:

- Increase/decrease the volume of the music
- Mute/un-mute the volume

Increasing/decreasing volume

To increase/decrease the volume of the music:
MUSIC RELATED FUNCTIONS

1. Rotate the knob clockwise/anti-clockwise to increase or decrease volume.

**NOTE:**
You can also use the control elements on the Steering Wheel or the IR Remote Control to increase/decrease the volume.

Muting/un-muting volume

To mute/un-mute volume:

1. Press the button. The system mutes the volume. When you press the button again, the system will un-mute the volume.

**NOTE:**
You can also press the control element on the IR Remote Control to mute the volume.

**NOTE:**
For some Bluetooth audio devices, all repeat functions may not work. The availability of the functions is dependant on the Audio/Video Remote Control Profile (AVRCP) version of your device.

REPEATING TRACK/FOLDER

You can either repeat a track or repeat music tracks in a folder.

To repeat a track or tracks in a folder:

1. When in the Media screen, press the button. The system repeats the current track. When you press the button again, the system repeats the tracks in the current folder. If you press the button for the third time, the repeat action is stopped.

**NOTE:**
You can also press the control element on the IR Remote Control to repeat track/folder.
NOTE: For iPod devices, you can repeat only the tracks in the device.

NOTE: The repeat functionalities are not supported for the AUX-In music sources.

PLAYING TRACKS RANDOMLY

You can enable the system to randomly select and play music tracks available in a folder or all music tracks in the media source, instead of playing them in the sequence they are stored.

To randomly play music tracks:

1. When in the Media screen, press the button. The system randomly plays all tracks in the current folder or all music tracks in the media source. If you press the button again, the shuffle action is stopped.

NOTE: You can also press the control element on the IR Remote Control to randomly play all tracks in a folder.

NOTE: For iPod devices (Apple devices), you can randomly play all tracks only in the music source device.

NOTE: For some Bluetooth audio devices, all random functions may not work. The availability of the functions is dependant on the Audio/Video Remote Control Profile (AVRCP) version of your device.

NOTE: The shuffle functionalities are not supported for the AUX-In music sources.
MUSIC RELATED FUNCTIONS

PLAYING NEXT/ PREVIOUS MUSIC TRACKS

When in a music track, the system allows you to play the next/previous music tracks.

To play the next/previous music tracks:

1. From within the Media screen, SP the or the button to play the next or previous track respectively. The system plays the next/previous track.

NOTE:
You can also do a SP of the or the IR Remote control elements or press the and the Steering Wheel control elements to play the previous or next music track respectively.

NOTE:
The next/previous music track functionalities are not supported for the AUX-In music sources.

NOTE:
For some Bluetooth audio devices, the playing next/previous music tracks functions may not work. The availability of the function is dependant on the Audio/Video Remote Control Profile (AVRCP) version of your device.

PERFORM FAST FORWARD/Fast REWIND

You can fast forward or fast rewind the music tracks to quickly complete playing them and move ahead or backward in the folder.

To fast forward or fast rewind:

1. From within the Media screen, LP the or the button. The system fast forwards or fast rewinds the music tracks until the button is released
and the action is stopped. The system plays the music track that is in focus when the action is stopped.

**NOTE:**
You can also do a LP of the or the IR Remote control elements to fast rewind or fast forward music tracks respectively.

**NOTE:**
The fast forward/ fast rewind of music tracks functionalities are not supported for the AUX-In music sources.

**NOTE:**
The fast forward/fast rewind operation response depends on the Bluetooth Device response.

### PLAYING NEXT/PREVIOUS FOLDER

When in a music track, the system allows you to shift to the next/previous folder and play the music tracks in them.

To shift to the next/previous folder:

1. When in the Media screen, press the or the button to shift to the previous or next folder respectively. The system plays the first music track in the selected folder.

**NOTE:**
You can also long press the and the Steering Wheel control elements or IR Remote control elements to play the previous or next folder respectively.
MUSIC RELATED FUNCTIONS

NOTE:
The next/previous folder functionalities are not supported for the iPod (Apple devices) devices, Bluetooth devices and AUX-In music sources.

VIEWING MUSIC TRACK INFORMATION

To view the details of a music track:

1. When the music track is played, press the button. The system displays the Song Info of the track, which contains details like, Song name, Artist, Album, Genre, Year, Album number, Track number and so on.

NOTE:
The view music track information functionality is not support for the AUX-In music sources.

NOTE:
The information displayed by the functionality is dependent on the information stored in the music track and supported by the media source device.

BROWSING THROUGH THE MEDIA CONTENT

You can perform a category based browsing of media content stored in a media device.
NOTE: The types of categories supported will depend on the Media source/device.

To browse through the media content:

1. In the Media screen, select the Browse button. The system displays the Browse screen with applicable categories list.

NOTE: You can also view the Browse screen, by pressing the OPTIONS button or the knob from within the Media screen and selecting the Browse menu option.

2. Select the required category from the list. The system displays the music tracks grouped under the selection.

3. From the available music tracks, chose from the required music track. The system plays the selected music track.

SCANNING THROUGH THE MEDIA DEVICE

DEFINITION:

When you are unsure of the music track you want to hear, you can scan through the tracks on your media source. While scanning, the system plays each track for 10 seconds. You must stop the scanning to continue hearing to a track.

NOTE:

You can scan through a USB/iPod media device for the required music track.

To scan through a media device:

1. When in the Media screen, press the OPTIONS button. The system displays the Options screen.

2. Navigate to and select the Scan option. The system displays the Scanning in progress screen and plays
MUSIC RELATED FUNCTIONS

each track until the scanning is stopped for 10 seconds. the name of the currently played track is also displayed in the screen.

NOTE:
You can also initiate scanning of the Media device by pressing the IR Remote control element.

NOTE:
If you browse to a category and then initiate the scan, only the tracks in the selected category will be scanned.

NOTE:
You can cancel the scanning process to play a track completely.

Stopping Media Device Scanning

To stop scanning of the media device:

1. In the scan screen, select Cancel, using the knob. The system stops scanning the media device and starts playing music from the current music track.

Figure 22: Media Source Scanning in Progress
PHONE

Using the Bluetooth capability, you can pair and connect your phone to the CONNECTNEXT® infotainment system. Once both the devices are connected you can:

- Access the phone contents like phone book contacts, call logs, music and so on through the system.
- Make or attend phone calls even while driving through the infotainment system hands-free capability.

⚠️ NOTE:

Few mobile phones may not support all the phone related features of the Infotainment system. It is recommended that you refer to the user manual of your mobile phone to understand its bluetooth and other capabilities.
PAIR DEVICES

Connecting your phone with the infotainment system is called as pairing. The CONNECTNEXT® infotainment system supports a maximum of 10 paired devices. A device once paired need not be paired again unless the pairing is deleted. A phone with an existing pairing with the infotainment system will be automatically connected when bluetooth is enabled on the phone and it is within the range of the system.

At a time, only 1 Phone can be connected to the Infotainment System, although a maximum of 10 devices can be paired.

Pairing can be initialized only from your phone, when the Device Visibility option is enabled in the CONNECTNEXT® infotainment system. The default state of the device visibility is ‘Enabled’. Connection/disconnection of the phone with the system can also be controlled only from the phone.

To pair your phone and the infotainment system:

1. Initiate pairing from your phone. The system prompts you to confirm the bluetooth pin of the phone.

2. Select Yes. The system initiates the pairing of the infotainment system and your phone. If the pairing of the phone and the infotainment system was successful, the system displays the phone in the Paired Devices screen. A copy of your phone data like phone book (phone numbers and other contact details) is also created in the system.

**NOTE:**

If there are already 10 devices paired to the system, a message will be displayed asking you to delete an existing pairing to enable a new pairing.
GUIDELINES FOR PAIRING DEVICES

Some of the guidelines for successfully pairing and connecting your phone with the infotainment system are:

- Ensure that Bluetooth feature is switched ON in your phone for successful pairing or auto-connection with your infotainment system.
- Ensure that the phone and the infotainment system are set to be visible to one another (refer to the Bluetooth setup settings of your phone and infotainment system).
- Ensure that your phone is not in Battery Saver or Airplane mode.
- Ensure that the phone and the infotainment system are close to each other (in range) and there are no obstructions blocking the phone and the infotainment system connectivity.
- Ensure that your phone book contacts do not have special characters or blanks before their name. If there are such contacts, please rename them.

TROUBLESHOOTING STEPS FOR PAIRING DEVICES

If you are unable to pair your phone with the infotainment system even after following the guidelines, try the following troubleshooting steps:

1. Refer to the user manual of your phone to verify whether all instructions for reset, connection and pairing have been followed.
2. Re-initiate Bluetooth pairing search or connection request from the phone. Pairing search enables faster pairing or connection between the devices.
3. If the above steps do not help, start the pairing process from the beginning.
4. If the pairing is still unsuccessful, try clearing the paired devices list from the Bluetooth settings of your phone and reset your phone, if required. Do the same on the infotainment system, if necessary.

If even after following the troubleshooting steps you are unable to pair the devices, any one of the following conditions might be true for your phone:

- Compatibility with 3rd party phones depends on the Bluetooth standards, Bluetooth versions, OS version and
PAIR DEVICES

application software deployed on the phone by its manufacturer. So, the Bluetooth functions on your phone may not support pairing of devices or is not compatible with the infotainment system due to the differences in Bluetooth software versions.

- It is recommended that you update the firmware of your phone when you receive a message from the phone manufacturer prompting you to upgrade, as these upgrades are meant to provide the latest and more defect free software to you.
- Generally Bluetooth SIG certified phones are known to work reliably with the infotainment system. Please check if your phone complies with the Bluetooth standards.
MANAGE PAIRED DEVICES

The infotainment system allows you to:

- View the list of devices paired to it
- Delete paired devices

VIEW PAIRED DEVICES

To view the list of devices paired with the infotainment system:

1. In the Bluetooth Setup options, navigate to and select Paired Device List. The system displays the list of devices that are paired with the system.

CONNECT/DISCONNECT A PAIRED DEVICE

You can connect to a paired device to access the media related data like music and/or phone related data like contacts and call log stored in the device. Each device paired with the system are by default connected for both media and phone.
MANAGE PAIRED DEVICES

DELETE PAIRED DEVICES

You can either delete a paired device or all devices that are currently paired with the infotainment system.

Deleting All Paired Devices

To delete all paired device:

1. In the Bluetooth Setup options, navigate to and select **Delete Devices**. The system displays the delete options for the paired devices.
2. Select **Delete All** option. The system prompts you to confirm the deletion of all paired devices.
3. Select **Yes**. The system deletes all devices paired with the infotainment system.

Deleting a Paired Device

To delete a paired device:

1. In the Bluetooth Setup options, navigate to and select **Delete Devices**. The system displays the delete options for the paired devices.
2. Select **List All Devices** option. The system displays the Paired Devices screen with the list of devices currently paired with the system.
3. Navigate to and select the required device for deletion. The system prompts you to confirm the deletion of the paired devices.
4. Select **Yes**. The system deletes the selected device that was paired with the infotainment system.

**NOTE:**

If the selected paired device is currently connected, the device will be disconnected before the device name is deleted from the pairing devices list.
PHONE FUNCTIONS

When a mobile phone is paired and connected to the infotainment system, you can handle the following phone operations through the hands-free capability of the system:

- Automatically connect to the mobile phone
- View phone details
- View call list (call log) and phone book (contacts)
- Make an outgoing call
- Accept/reject an incoming call
- Put a call on hold
- Handle two calls at a time
- Conduct a conference call
- Toggle between the Phone handset and the hands-free capability

VIEWING PHONE DETAILS

From the infotainment system display screen, you can get details of your mobile phone like, battery strength, network strength and so on.

VIEWING CALL LOGS

You can view all calls, received or dialled from the infotainment system or missed when connected to the system, in the call list (call log). The system displays up to 10 past calls that were dialled or received using it.

To view the call list:

1. Press the PHONE button. The system displays the Phone submenu options.

   NOTE:

   If no mobile phone is paired/connected to the system, a popup message indicating the unavailability of a currently connected device is displayed. You are also prompted to pair a new device (mobile phone) in the message.
PHONE FUNCTIONS

**NOTE:**
You can also select the phone menu from the Home screen to display the Phone submenu options.

2. In the Phone submenu options, navigate to and select the **Call Log** option. The system displays the call log submenu options.

3. In the call log submenu options, select the required option from **All Calls/Missed Calls/Received Calls/Dialed Calls**. The system displays details of up to 10 past calls in the selected call list type.

**NOTE:**
The system can take some time to display the list of calls and will display a message while it retrieves the call list.

**VIEWING PHONE BOOK**

The infotainment system allows you to view up to 1500 contacts stored in your phone book.

To view the contacts:

2870 5840 9911

1. Press the **PHONE** button. The system displays the Phone submenu options.

2. In the phone submenu options, navigate to and select the **Contacts** option. The system displays the Contacts screen with the list of contacts stored in your phone book.

**NOTE:**
The system can take some time to display the list of phone book contacts and will display a message while it retrieves the contact list.

**NOTE:**
Your phone must support PBAP (Phone Book Access Profile) to enable download and viewing of phone book contacts from the system.
Making an Outgoing Call

The infotainment system supports three different ways of making a phone call. They are:

- Dialling the phone number manually
- Dialling by selecting the phone number from the phone book
- Dialling by selecting the phone number from the call list

Manually Dialling a Phone Number

To make a call by manually dialling a phone number:

1. In the Phone submenu options, select the Dial option. The system displays the Keypad to enter the phone number.

   **NOTE:**
   Refer to the Viewing Call List section for information on displaying the phone submenu options.

2. Enter the digits of the phone number in the keypad.

3. After entering the phone number, navigate to and select the Call button. The system initiates the outgoing call.

   **NOTE:**
   To delete an incorrect entry, use the button in the keypad to delete the entire number or digits in the number. On pressing the clear button, the system deletes one digit at a time starting with the last digit in the number.

Figure 26: Outgoing Call Screen
PHONE FUNCTIONS

Dialling Using the Phone Book

To make a call by dialling a number in the phone book:

1. Open the Contacts screen. Refer to the Viewing Phone Book section for the steps to open the Contacts screen.
2. Navigate through the contacts in the contact list and select the required number. The system dials the selected number and initiates the outgoing call.

Dialling Using the Call Log

To dial a number from the list of previous calls (call log):

1. Display the required call list. Refer to the Viewing Call List section for information on displaying the required call list.
2. Select the required number from the list. The system dials the selected number and initiates the outgoing call.

Accepting/Rejecting an Incoming Phone Call

When you receive a phone call, you can either accept or reject the call using the infotainment system.
To reject the incoming call:

1. Select the **Reject** button in the popup message. The system disconnects the call.

   **NOTE:**
   You can also reject the call using the  
   Steering Wheel control.

**HANDLING IN-CALL FUNCTIONS**

When you are in a call (outgoing or incoming), the system supports you to perform any of the following functions:

- Respond to the Interactive Voice Response (IVR) with the required details
- Put the call on hold
- Switch between phone (handset) and system (hands-free) capability
- Accept another incoming call
- Switch between calls
- Conduct a conference call by adding another number or by merging two existing calls
- Mute the microphone
- End the call

**Responding to the IVR**

When you have called a contact with Interactive Voice Response (IVR) like customer care number of bank and so on, you will have to enter some details through the phone. For example, you might have to enter your bank account number, when prompted by the IVR. You can use the Keypad in-call option to enter such details through the infotainment system.

To display the Keypad and to respond to the IVR with details:
PHONE FUNCTIONS

1. In the active call screen, navigate to and select the Keypad button. The system displays a keypad for you to enter the details as prompted by the IVR.

Putting a Call on Hold

To put a call on hold:

1. In the active call screen, navigate to and select the Hold button. The system puts the currently active call on hold.

Switching Between Handset and Hands-Free

When in an active call, the system allows you to switch between the phone handset and its hands-free capability and also vise versa.

To toggle between phone and system:

1. In the active call screen, navigate to and select the Handset button to switch the call from system to phone or the Handsfree button to switch from phone to system.

Accepting Another Incoming Call

When you are in an active call and receive another incoming call, you can put the active call on hold and accept the new call. The system allows you to have a maximum of 2 calls at any given time, one on hold and the other active.

To accept another incoming call:

1. In the active call screen, the system displays a new call popup message with Accept and Reject buttons, when you receive a new incoming call. Select the Accept button in the new call popup message. The system puts the first call on hold and activates the new call.

Switching Between Calls

When you have 2 calls happening simultaneously (one on hold and other active), the system allows you to switch between the calls without ending any of them.

To switch between calls:

1. In the active call screen, select the Swap button. The system puts the active call on hold and activates the
second call, which was on hold till then. To activate the previous call, follow the same step.

To create a conference call by dialling additional number:

1. In the active call screen, press the OPTIONS button. The system puts the active call on hold and displays the in-call Options menu.
2. In the in-call Options menu, navigate to and select the Add Call option. The displays the Add Call submenu with options to dial the additional number from the Contacts, Call Log or Dial (Keypad).
3. Follow the steps listed in the Making an Outgoing Call section for dialling a number using the various options. The system initiates an outgoing call for the selected number.
4. In the new call screen, press the OPTIONS button. The system displays the Options menu with options to handle the 2 calls (one on hold and one new call).
5. In the Options menu, navigate to and select the Merge option. The system merges the 2 calls to create a conference call. The first call is activated before merger.

**Conducting a Conference Call**

When in an active call, you can connect an additional phone number to create a conference call between the contacts. You can create a conference call by either dialling to an additional number or by accepting a new incoming call.
To create a conference call by accepting a new incoming call:

1. Accept a new incoming call as detailed in the Accepting Another Incoming Call section.
2. In the new call screen, press the **OPTIONS** button. The system displays the Options menu with options to handle the 2 calls (one on hold and one new call).
3. In the Options menu, navigate to and select the **Merge** option. The system merges the 2 calls to create a conference call. The first call is activated before merger.

---

**Figure 29: Phone In-Call Options**

**Figure 30: Conference Call Created**
**Muting the Microphone**

When in a call (both individual call and conference call), you can mute the microphone to disable the other participant(s) in the call from hearing you.

To mute the microphone,

1. In the active call screen, press the **OPTIONS** button. The system displays the Options menu.
2. In the Options menu, navigate to and select the Mute Microphone option. The system selects the check box beside the option and puts the call on mute.

![NOTE:]

To un-mute the microphone, repeat the above step again. The system clears the Mute Microphone check box.

**Ending a Call**

To end an active call:

1. In the active call screen, select the **End** button. The system disconnects the call.

![NOTE:]

You can also end the active call using the **Steering Wheel** control.
CONNECTNEXT® APPS

GENERAL INFORMATION

CONNECTNEXT® App will give information about the compatible apps that works with the infotainment system. It is mandatory to install this App in the smartphone for other compatible apps to function properly.

NOTE:
The apps compatibility will depend on the vehicle variant.

KEY FEATURES

The key features of the CONNECTNEXT® App are as given below:

- This App will display all compatible apps once mobile is connected with vehicle infotainment system.
- CONNECTNEXT® App displays all apps developed for working with infotainment system along with compatible apps.

NOTE:
CONNECTNEXT® App and apps working with CONNECTNEXT® App are compatible to mobile with Android operating system only.

NOTE:
Installation of CONNECTNEXT® App in the smartphone is mandatory for the functioning of the compatible apps with your vehicle.

NOTE:
Smartphone shall be connected to infotainment system and internet connectivity should be enabled in order to configure the CONNECTNEXT® App for the first time in the vehicle.

NOTE:
Not all mobiles with different operating system versions supports App functionality reliably. There are mobiles in which App crashes/closes intermittently due to device specific implementations.
INSTALLING CONNECTNEXT® APP

To install the CONNECTNEXT® App:

1. Open Google Playstore on your android based smartphone.
2. Search for the CONNECTNEXT App.
3. Download and install CONNECTNEXT App on your smartphone. The CONNECTNEXT App Icon is displayed on your smartphone.
CONFIGURING CONNECTNEXT® APP

To configure the CONNECTNEXT App:

1. Ensure that you have at least one Google account configured in the smartphone.
2. Click the CONNECTNEXT® App icon in your smartphone home screen. The App is opened.
3. Connect smartphone with the vehicle infotainment system via Bluetooth or USB. The connection status symbol will turn as green "······" after successful connection.

**NOTE:**
At the time of configuration of CONNECTNEXT® App, Internet connectivity must be available.

4. Click on the button with the Google icon.
5. If you are signing in to the CONNECTNEXT® App for the first time, you will be prompted to enter your name. The CONNECTNEXT® App Home screen will be displayed after successful sign in and configuration.

CONNECTNEXT® APP HOME SCREEN

There are three tabs displayed in the CONNECTNEXT® App Home Screen, All, Compatible and Installed.

- The **All** tab consists of the list of apps that work with the CONNECTNEXT® App.
- The **Compatible** tab consists of the list of apps that are compatible with the currently connected vehicle, after configuration.
- The **Installed** tab consists of the list of apps that are currently installed in the smartphone and compatible with the CONNECTNEXT® App.
NOTE:
If an App is compatible with the CONNECTNEXT® App and is currently not installed in your smartphone, you can install the App by just clicking on the App icon.

NOTE:
If an App is compatible with the CONNECTNEXT® App and is currently installed in your smartphone, you can launch the App by clicking on the App icon from any of the tabs.

NOTE:
You can read short description of the App by clicking on the dropdown icon provided along with App. You can also view the installation status and compatibility status of the App.
CONFIGURING CONNECTNEXT® APP

CONNECTNEXT® APP USER PROFILE INFORMATION

You can view the following information related to your profile in the CONNECTNEXT® App:

- User Profile
  - Name
  - Email Id
- Last Connected vehicle
  - Vehicle Identification Number (May depend on your vehicle variant)
  - Vehicle Name

Figure 33: CONNECTNEXT® App Menu
The following apps, which work with the CONNECTNEXT® App, can be used in the TATA Hexa vehicle, by connecting your smartphone to the Infotainment system.

- NaviMaps App
- Juke-Car App
NAVIGATION FEATURE

GENERAL INFORMATION

Navigation in general refers to the process of identifying our current position and accordingly planning and following a specific route to reach our required destination. A Navigation application helps us to do this even when we have limited or no information about our current location and its surroundings.

Mobile Navigation App Vs Embedded Navigation Systems

Commonly, automobiles with navigation facility come with embedded navigation systems. However, these systems have the following drawbacks:

1. They are generally high priced
2. They come with a fixed set of map(s), which can be upgraded with the help of the dealer or vendor, if required and if available.

The latest Mobile based Navigation Apps eradicate these drawbacks. They are comparatively cheaper and as they are Internet based, they can be upgraded with new or latest maps when ever required.

The path breaking Navigation feature of the CONNECTNEXT® Infotainment System allows you to take complete advantage of these benefits of a Mobile based Navigation App.

Using the Navigation feature, you can integrate your vehicle infotainment system with the NaviMaps Mobile Navigation App. For the integration, you just need to download and install the NaviMaps App and the ConnectNext Apps on your smartphone and connect your smartphone to the infotainment system through USB.

⚠️ NOTE:

All navigation functions of NaviMaps App that are available through your smartphone device may not be available through the infotainment system. Refer to the CONNECTNEXT® Nav. Limitations section for more information on the limitations.
Traffic Rules and Road Safety

A navigation system/application can only guide with the best possible route to reach your destination after considering the current traffic situations. It is your responsibility to follow the traffic rules and road safety rules while driving.

Safety Tips

You must be vigilant about the hazards or problems in the road and also about any other traffic regulation that are recently introduced like conversion of a road to one-way. If a navigation instruction provided by the App contradicts a traffic regulation, please follow only the traffic regulation.
INSTALLING APPS FOR NAVIGATION

The CONNECTNEXT® Navigation feature requires the installation of the following 2 Mobile Apps that can be downloaded from your smartphone Google Android Play Store:

- **NaviMaps App**: This is the navigation application.
- **ConnectNext App**: This application is responsible for establishing the connection between your smartphone and your vehicle CONNECTNEXT® infotainment system. For information on installing the ConnectNext App, refer to the Install ConnectNext Apps section.

**INSTALL NAVIMAPS APP**

The ConnectNext App replicate the navigation functionality of the NaviMap App on your vehicle CONNECTNEXT® infotainment system.

To install the NaviMaps App:

1. Open the Play Store on your Android based smartphone.
2. Search and find the NaviMaps App.
3. Tap the NaviMaps App icon. The App page is displayed.
4. Tap the Get button. The Install button is displayed.
5. Tap the Install button. The App is downloaded and installed on your smartphone.

**Installing Navigation Maps**

The NaviMaps App supports the following 4 region maps for India:

- East
- South
- North
- Central

You can download the map of your choice from the NaviMaps App-> Manage Maps menu option. Refer to the Manage Maps section for more information on the maps and the steps for installing them.

**UNLOCK NAVIMAPS PREMIUM FUNCTIONALITIES**

To unlock the NaviMaps App premium functionalities:
1. Connect your smartphone to the infotainment system. For the steps on connecting to the infotainment system, refer to the Connect to the Infotainment System section.

2. Once the connection between your smartphone and the vehicle infotainment system is enabled, the smartphone is authenticated. If authenticity is approved, the premium functionalities of NaviMaps like Pro Guidance, Live Traffic and so on are unlocked.

**NOTE:**

CONNECTNEXT® App must be installed in your smartphone for using the NaviMaps App for navigation functionalities.

**NOTE:**

CONNECTNEXT® App in your smartphone must be connected to your vehicle infotainment system to start using the NaviMaps App.

**NOTE:**

While enabling turn by turn guidance in NaviMaps, your smartphone must be connected to your vehicle infotainment system via USB and internet connection must be enabled for data connectivity.
The CONNECTNEXT® Turn-By-Turn (TBT) Navigation feature allows you to integrate your vehicle infotainment system with the NaviMaps Mobile App and utilize the turn-by-turn navigation direction feature of the App while driving, from within the system.

To use the TBT Navigation feature, you must first have installed the ConnectNext apps on your smartphone, in addition to the NaviMaps App. Refer to the Installing APPs for Navigation section for the installation steps. Next you will need to connect your smartphone to the infotainment system.

GET STARTED WITH THE TBT NAVIGATION FEATURE

When the connection between the vehicle and the ConnectNext App is enabled, the Navigation menu option in the Home Screen is enabled/highlighted. You can now start using the TBT Navigation feature.

To start using the TBT Navigation feature:

1. Select the Navigation menu option. The system prompts you to initiate the NaviMaps App and select the required destination in your smartphone.
NOTE:
If the connection between the vehicle and the ConnectNext App is disabled or the NaviMaps App is not installed/enabled and you select the Navigation menu option, the system prompts you with the related message.
2. Once you launch the NaviMaps App in your smartphone, the infotainment system displays a disclaimer. The system auto-closes the disclaimer after 5 seconds.

If the destination is still not set, the system prompts you to select the destination and start the Navigation. Once the destination is set and navigation is started, the Navigation screen is displayed.

The Navigation Screen contains the following details/functions:

Table 6: Navigation Screen Details/Functions

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>TBT Navigation Feature Icon</td>
</tr>
</tbody>
</table>
The TBT Navigation screen provides you with the following 5 options to handle the navigations:

- Recent Places
- Favorites
- POI
- Route Direction Preview
- Setup

To select the required option:

1. In the Navigation screen, press OPTIONS. The system displays the Navigation submenu options.
2. Select the required submenu option.

Recent Places

When selected, the Recent option displays the list of recently travelled destinations. From the list of recent destinations,
you can select anyone destination as a new destination or as a via point.

**NOTE:**
The infotainment system only displays the list of favorite destinations. You can set a destination as your favorite only from the smartphone NaviMaps App.

**Favorites**

When selected, the Favorites option displays the list of destinations that you had saved as your favorite destinations, in the My Places (Favourite) option of the NaviMaps App. From the list of favorites destinations, you can select anyone destination as a new destination or as a via point.
POI (Point of Interest)

When selected, the POI option displays the following list of 20 POI categories.

- Restaurants
- Parking places
- Fuel stations
- Vehicle service stations
- Pharmacies
- Clinics
- Hospitals
- Police stations
- ATMs
- Post offices
- Bus stops
- Taxi stands
- Airports
- Train stations
- Shopping malls
- Hotels
- Banks
- Courier services
- Museums
- Educational institutes
- Cafe and Bars
- Cinemas
- TATA Dealership
- Places of worship

You can browse and select the required category to view the related POIs near you. From the list of related POIs, you can select anyone POI as a new destination or as a via point.
Route Direction Preview

When selected, the Route Direction Preview option displays the route directions for a destination as a list of turn-by-turn textual descriptions with corresponding descriptive icons in sequence. The different descriptive icons that the system displays are:
<table>
<thead>
<tr>
<th>Descriptive Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1" alt="Icon" /></td>
<td>Go straight.</td>

</tr>
<tr>
<td><img src="image6" alt="Icon" /></td>
<td>Take the last exit in a 8 exit round about.</td>
</tr>
</tbody>
</table>
You can view the route directions for a currently set destination or a recent destination or a favorite destination or a POI.

### Setup

When selected, the Setup option allows you to perform the following actions:

- Enable/disable navigation voice prompts
- Set the navigation voice prompt volume

To enable navigation voice prompts:
1. In the Navigation submenu options, select the Setup option. The system displays the NAVI (Navigation) Setup screen.

2. In the Setup screen, select the Navigation voice prompts checkbox. The system enables navigation voice prompts.

NOTE:
To disable navigation voice prompts unselect the Navigation voice prompts checkbox.

To set the navigation voice prompt volume:

3. In the Navigation submenu options, select the Setup option. The system displays the NAVI (Navigation) Setup screen.

4. In the Setup screen, select the Voice Prompt Volume field modify the settings of the field, by setting it to a new value in the range of **0 to 30**.
CONNECTNEXT® TBT NAVIGATION

TBT NAVIGATION FEATURE CONCURRENCES

In this section we will look at how the TBT Navigation feature functions behaves in collaboration with the other features of the CONNECTNEXT® infotainment system.

When a media source or radio is played

You can initiate the navigation to a destination and then play a media source or radio. The navigation will be continued in the background. When navigation prompts are generated i.e. indicators of turnings and so on, the visual prompts are displayed as a separate screen. The system pauses the currently played media source/radio station and plays the navigation audio prompts.

NOTE:

For some smartphones, the system reduces the volume of the BT media source and plays the navigation prompts. This feature is dependent on your smartphone capabilities.

When an incoming call is received

During an active navigation mode, if you receive an incoming call, the system displays the call details are displayed as a separate screen. You can either accept or drop the call. If accepted, the navigation visual prompts are disabled till the call is completed.

When reversing the vehicle

During an active navigation mode, if you engage the Reverse gear, the system displays the Park Assist screen and disables the audio and visual navigation prompts. Once the Reverse gear is disengaged, the Navigation audio and visual prompts will be enabled.
NAVIMAPS APP DISCLAIMERS

MapmyIndia reserves all rights concerning the information contained herein. This document or any part thereof may not be reproduced, distributed, or translated into other languages in any way or form except with the written approval of MapmyIndia. This document is provided to the user on an 'as is' basis. For better performance, certain features are optimized at the Infotainment System end and the functionality of Navigation might not be exactly the same as it appears in the smartphone.

e.g. 2D maps and 3D landmark view is not present in the infotainment system.
The following limitations are applicable to the integration or usage of the Mobile based navigation application, NaviMaps, from the CONNECTNEXT® infotainment system:

- Typing of a destination location through the infotainment system is unavailable. You can set a destination location from the infotainment system, by selecting the location from a list of favorite destinations, recent destinations or POIs.
- The TBT Navigation feature of the infotainment system is supported only on some smartphones i.e. only on smartphones that have Android 4.0 ICS or above.
The Juke-Car Application is a music player App, which allows you to pool tracks from multiple smartphones when they are connected to your smartphone via WI-FI Hotspot.

When your smartphone is connected to the CONNECTNEXT® infotainment system (through Bluetooth or AUX), you can start hosting a common playlist by using the Juke-Car App. Your friends/other passengers in the vehicle can join you over Wi-Fi Hotspot and start sending their preferred tracks to the common playlist. The infotainment system will play the tracks in the common playlist one after the other.

**INSTALL JUKE-CAR APP**

To install the Juke-Car App:

1. Open the Play Store on your Android based smartphone.
3. Tap the Juke-Car App icon. The App page is displayed.
4. Tap the **Get** button. The Install button is displayed.
5. Tap the **Install** button. The App is downloaded and installed on your smartphone.

**CONNECT JUKE-CAR APP TO THE INFOTAINMENT SYSTEM**

To connect to the infotainment system and start playing the common playlist:

1. Tap the **Juke-Car** App icon on your smartphone. The Juke-Car App Home screen is displayed.
2. Click the **Start Juke-Car** button. The App is launched and you will be able to create your Juke-Car (common playlist). Your friends can connect to your smartphone using Hotspot and play their favorite songs too using your Juke-Car.

Figure 48: Juke-Car App Home Screen
3. When prompted to connect to the infotainment system, select either AUX IN or Bluetooth option to connect to the infotainment system. Once the connection with the infotainment system is established, the Juke-Car Started screen is displayed.

**NOTE:**

If the connection with the infotainment system is lost, the App is disconnected.
JUKE-CAR APPLICATION

Figure 50: Connect Phone to the Infotainment System Screen

Figure 51: Juke-Car App Started Screen
JOIN JUKE-CAR APP

If your friends want to join your Juke-Car and start sharing and playing their favorite tracks using the common playlist:

In the Juke-Car App home screen of their smartphones, your friends must click the **Join Juke-Car** button. Your friends will be provided access to your Juke-Car (common playlist) and the Juke-Car Joined screen is displayed. Your friends can now start sending their preferred tracks to the common playlist. The Juke-Car will play the tracks in the common playlist one by one.

** NOTE: **

To join your Juke-Car and share their tracks, the smartphones of your friends must be connected to your smartphone over Wi-Fi Hotspot.

consent of the user it shall not be shared with any third party unless required by law.

This application is developed for use in India only. All disputes shall be subject to Mumbai Jurisdiction.
The CONNECTNEXT® infotainment system supports handling and viewing of some vehicle feature/components controls. It allows you to:

- Set vehicle door locking options
- Manage the Park Assist system settings, if available
- Handle exterior approach lights

**NOTE:**
The above features are not standard in every vehicle variant. Features that are unavailable in the vehicle cannot be controlled using the infotainment system. Please refer to the Owner's Manual of your vehicle or check with your vehicle dealer to confirm the list of features available in your vehicle.

Options to handle all these functions are available in the Vehicle Setup screen of the infotainment system.

To display the Vehicle Setup screen:

1. Press the **SETUP** button. The system displays the Setup menu options.
2. Navigate to and select the **Vehicle Setup** option. The system displays the Vehicle screen with various options for handling the vehicle door lock/unlock, park assist and exterior lights.
SET LOCK/UNLOCK OPTIONS

In the Vehicle Setup screen, you can set the following options relating to the remote door lock/unlock feature of your vehicle:

- Drive away locking
- Vehicle auto relock

**NOTE:**

For steps to display the Vehicle Setup screen, refer to the Display the Vehicle Setup Screen section.

---

**SETTING DRIVE AWAY LOCKING**

**DEFINITION:**

The Drive Away Locking feature automatically locks all vehicle doors when you start driving the vehicle and reach a specific speed.

To set the Drive Away Locking feature:

1. In the Vehicle Setup screen, navigate to and select the **Central Locking** option. The system displays the Central Locking screen.
2. In the Central Locking screen, navigate to and select the **Drive Away Locking** option. The system selects the check box and enables the feature.

**NOTE:**

You can select the Drive Away Locking option again to clear the check box and disable the feature.
SET LOCK/UNLOCK OPTIONS

SETTING VEHICLE AUTO RELOCK

DEFINITION:

With the Vehicle Auto Relock feature, when you unlock the vehicle through the remote key and none of the doors are opened for 60 seconds, the doors will be re-locked automatically, for safety purpose.

To set the Vehicle Auto Relock feature:

1. In the Vehicle Setup screen, navigate to and select the Central Locking option. The system displays the Central Locking screen.
2. In the Central Locking screen, navigate to and select the Vehicle Auto Relock option. The system selects the check box and enables the feature.

NOTE:

You can select the Vehicle Auto Relock option again to clear the check box and disable the feature.
MANAGE PARK ASSIST (IF APPLICABLE)

The Park Assist feature is vehicle dependant. If you have the park assist system in your vehicle variant, you will be able to manage it using the infotainment system. The system allows you to:

- Activate park assist
- Enable Park Assist Delay Timer
- Set park assist volume

⚠️ NOTE:
For steps to display the Vehicle Setup screen, refer to the Display the Vehicle Setup Screen section.

ACTIVATING PARK ASSIST

You can activate or deactivate the Park Assist system of your car without engaging/disengaging the Reverse gear.

To activate the Park Assist system from your infotainment system:

1. In the Vehicle Setup screen, navigate to and select the Park Assist option. The system displays the park assist options.
2. In the Park Assist options, scroll to and select the Activate Park Assist option. The system displays the Park Assist screen.

⚠️ NOTE:
Display of the Park Assist screen is automatically activated when you engage the Reverse gear.
The system displays the Park Assist screen when the Reverse gear is engaged. The display is stopped when the Reverse gear is disengaged.
Unavailability of Park Assist Display

Sometimes even after activating park assist the component details are not displayed in the system. This will happen in the following situations:

1. A critical error has occurred in the Park Assist component and you need to contact the Tata service center
2. The Park Assist component is temporarily disabled because:
   1. A trailer is connected to your car
   2. The car speed is high

**NOTE:**

For more information on the Park Assist system refer to your vehicle user manual.
MANAGE PARK ASSIST (IF APPLICABLE)

**Delaying Park Assist Display Stop**

The system allows you to retain the Park Assist display screen even after the Reverse gear is disengaged. This feature is called as **Park Assist Delay Timer**.

3. Select the required timer option from 0 sec/5 sec/10 sec. When the Park Assist component is enabled next, the system retains the Park Assist display screen even after the Reverse gear is disengaged for the selected time period.

**Setting Park Assist Volume**

This option sets the volume related parameters of the vehicle Park Assist component.

To set the volume value for park assist:

1. In the Vehicle Setup screen, navigate to and select the **Park Assist** option. The system displays the Park Assist screen.
2. In the Park Assist screen, navigate to and select **Park Assist Volume** option. The system displays the Park Assist Volume screen.
3. In the Park Assist Volume screen, select Park Assist Volume filed and modify the value of the field, by setting it to a new value in the range of 0 to 15.
Retaining Audio During Park Assist

By default, the infotainment system stops the currently active media source, when the park assist feature is used. To retain the media source audio in the background even during park assist:

1. In the Vehicle Setup screen, navigate to and select the Park Assist option. The system displays the Park Assist screen.
2. In the Park Assist screen, navigate to and select Park Assist Volume option. The system displays the Park Assist Volume screen.
3. In the Park Assist Volume screen, navigate to and select the Mix With Audio option. The check box beside the option is selected.
MANAGE EXTERIOR LIGHTS

The Manage Exterior Lights feature is vehicle dependant. The infotainment system provides you the flexibility of handling the exterior approach lights of your vehicle:

MANAGING APPROACH LIGHTS

DEFINITION:

When you approach your car in the dark, you can switch on the Approach Lights (some exterior and interior lights of the vehicle) to identify your car as well as to find your way safely to it.

NOTE:

Refer to the owner’s manual of your vehicle to understand how to switch on the Approach lights.

The system allows you to set the time period for which the Approach lights will be illuminated after you switch them ON.

To set the Approach lights illumination time period:

1. In the Vehicle Setup screen, navigate to and select the Exterior Lights option. The system displays the Exterior Lights screen.
2. In the Exterior Lights screen, navigate to and select the Approach Lamps option. The system displays the various illumination time period options.
3. Navigate to and select the required illumination time period option from 30 seconds/60 seconds/90 seconds.
FREQUENTLY ASKED QUESTIONS

Some frequently asked questions related to the features and functions of the CONNECTNEXT® infotainment system are listed below along with their answers.

1. **I installed NaviMaps App in my smartphone but it doesn't work with my TATA vehicle?**
   
   Along with NaviMaps App, ConnectNext App shall also be installed for the TBT Navigation feature to work with your TATA car. If ConnectNext App is not installed, Go to the Play Store and install it.

2. **I installed ConnectNext App only in my smartphone will the TBT navigation feature work in my TATA vehicle?**
   
   Along with ConnectNext App, NaviMaps shall also be installed for the TBT Navigation feature to work with your TATA car. If NaviMaps App is not installed, Go to the Play Store and install it.

3. **I am already using NaviMaps App before I bought my TATA vehicle. Will the TBT Navigation feature work in my new TATA vehicle?**
   
   May not be. It depends on the version of the App which you were using. It is preferable to update the App for the TBT Navigation feature to work with your new TATA vehicle.

4. **Is internet connection required for using navigation**

   Internet connection is required only for the downloading of App and Maps and unlocking Pro-guidance for Voice prompts when connected to the infotainment system. After successful download and installation, you can use the TBT Navigation feature without your internet connection as maps are locally available in your smartphone. So, Internet charges might be applicable for download of App & Maps only but not for the usage of the NaviMaps, except while using the Live Traffic updates.

   **NOTE:**

   For using the Live Traffic function, you should ensure that the data connection of your smartphone is active.

5. **Which Map shall I download? And how much memory is required in my smartphone**

   NaviMaps installed in smartphone will prompt for downloading the App. Based on your choice you can download EAST, North, South or Central map of India. This is just to avoid huge data download and memory.
consumption in your smartphone. If you download either of the maps, you might need approximately 300MB (250MB for Map and 50MB for NaviMaps App). Total India map might be around 1.3GB. However, this also depends on the region of the map you have downloaded and version. It is to be noted that memory requirement changes as upgrades.

6. Will navigation in my TATA vehicle work with any navigation App?
   No. It will work only with NaviMaps App. Please check and install for the latest version available from the Play Store on your Android based smartphone.

7. Do I have to pay for App and Map database upgrades?
   At first time when NaviMaps App is installed, please Connect your smartphone with your TATA vehicle. After this you can install latest versions of the map for free. You are entitled for a maximum of 4 free upgrades in a span of 4 years from the date of purchase of your vehicle.

8. How frequently Map upgrades are released? And How it is informed to me?
   After you connect your smartphone to your TATA vehicle for TBT Navigation function, you are entitled for a maximum of 4 upgrades in a span of 4 years from the date of purchase of your vehicle. The frequency of Map upgrade releases is every 6 months and these upgrades will be notified on the NaviMaps mobile App.

9. Can my family members also use this TBT Navigation feature by downloading the same NaviMaps App? Do they have to pay?
   Yes. However, every other user shall also download and install the apps. Maximum of 4 distinct users per TATA vehicle are allowed. These 4 distinct users need not pay additionally. If users are more than 4 then user shall purchase pro-guidance version (in App purchase).

10. Should I enable GPS always in my smartphone?
   Yes. You should enable GPS in your smartphone when it is connected with your infotainment system for the Navigation function.

11. What should I do if GPS signal is not available?
   This TBT Navigation feature uses GPS from your smartphone. So your smartphone GPS reception is...
very important for reliable functionality of this feature. If you are getting weak or no GPS signal, ensure that you place your phone in a location of vehicle where it is safe and visible to sky and check for the better GPS reception availability.

12. **Navigation audio prompts are not audible enough. What should I do to increase the volume level?**

First try to increase the volume level from your smartphone. If it is still not sufficient then, when the TBT Navigation function is working, Press the **Options** button > select the Setup submenu option-> and select the **Voice Prompt Volume** field. You can adjust the setting accordingly.

13. **I installed ConnectNext App and NaviMaps in my smartphone will the TBT Navigation feature work in my TATA vehicle?**

Yes. However, the smartphone will be connected using Bluetooth only. The TBT feature will not work if the smartphone is connected via the USB cable.

14. **Will navigation in my TATA vehicle work with any smartphone?**

No. The TBT Navigation feature of the infotainment system is supported only on some smartphones i.e. only on smartphones that have Android 4.0 ICS and above. Please check with the dealer for details on the compatible list.

15. **Can I play audio from my smartphone when connected through the USB port?**

This behavior might vary based on the smartphone that you are using i.e. if your smartphone supports the Mass Storage Class mode. Additionally, you have to enable your smartphone in the Mass Storage Class mode, immediately after connecting to the Vehicle USB port.

16. **In Bluetooth Music, the song/metadata information displayed on the Phone and infotainment system does not come/match**

The music player running on the handset (phone) may not have the capability to send the details about the song to the Head Unit (infotainment system) OR the song downloaded to the handset does not have the details of the artist, album and other information set in the song properties. This may cause the Head Unit to show the song information as Unknown or it may show information of the Next or Previous song in the list. This condition may be recovered by pressing
FREQUENTLY ASKED QUESTIONS

17. **Media Player and Playback Audio mismatch on the infotainment system.**

This scenario can happen when the Navigation prompt is on the screen and the user presses the Media/Radio button on the infotainment system.

In this case, sometimes the screen may not get refreshed because of too many events to handle. This leads to Screen and Audio mismatch.

This condition can be recovered by pressing the Media button on the Head Unit.
