Dear Customer,

Welcome to the CONNECTNEXT® Infotainment System User’s Manual. The infotainment system in your vehicle provides you with state of the art in-car entertainment to enhance your driving experience.

Before using the infotainment system for the first time, please ensure that you read this manual carefully. The manual will familiarize you with the infotainment system of your car and its functionalities. It also contains instructions on how to use the infotainment system in a safe and effective manner.

We insist that all service and maintenance of the infotainment system of your car must be done only at authorized TATA service centers. Incorrect installation or servicing can cause permanent damage to the system. If you have any further questions about the infotainment system, please get in touch with the nearest Tata Dealership. We will be happy to answer your queries and value your feedback.

We wish you a safe and connected drive!

ABOUT THIS MANUAL

This guide introduces you to the CONNECTNEXT® Infotainment system and details its controls, options and operations.

In addition, the guide contains:

- Illustrations to provide orientations or identification of various options like buttons and menus.
- Cautions related to a topic such as Danger alerts, Security alerts, Warning statements, Caution notices and General notes.
- A list of abbreviations used in this guide with their explanation.
- An alphabetical index for quick identification of required topics.

CONVENTIONS

⚠️ DANGER:
Text that indicates to actions that might cause harm to personnel.

⚠️ SECURITY ALERT:
Text that indicates to actions which increases the potential for unauthorized access.

⚠️ WARNING:
Text that indicates to actions that might cause harm to the equipment.

⚠️ CAUTION:
Text that call for attention.

<<<< NOTE:
Text that provides some additional important information, which when ignored can cause inconvenience or tips that will help you in using the equipment.
SAFETY GUIDELINES

DANGER:
The infotainment system must be used in a way that allows you to drive the vehicle safely at all times. Failure to do so may result in an accident involving serious injury or death.

Keep this manual in the vehicle, so it will be handy for you to refer, when needed. If you sell or lend the vehicle, make sure this manual is available in the vehicle along with other standard booklets.

Please read and follow the safety guidelines listed in this section to avoid injury or property damage.

GENERAL SAFETY GUIDELINES

WARNING:
The infotainment system is a sophisticated electronic device. Do not allow improper access of the infotainment system.

DANGER:
Permanent hearing loss may occur if you play your music at loud volumes for prolonged duration. Exercise caution when setting the volume of your infotainment system.

DANGER:
Exposure of the infotainment system to water or excessive moisture can cause electric shocks, fire, or other damages.
SAFETY GUIDELINES WHILE DRIVING

⚠️ DANGER:
Glance at the screen of the infotainment system only when necessary and safe to do so. If prolonged viewing of the screen is necessary, park in a safe location and engage the hand brake.

⚠️ DANGER:
Make certain that the volume level of the infotainment system is set to a level that allows you to hear outside traffic and other warnings.

SYSTEM CARE AND MAINTENANCE

Exert utmost care while handling the infotainment system as partial or complete loss of the infotainment system functions due to intentional misuse is not covered under warranty. Some guidance for using or maintaining the system are listed below:

⚠️ WARNING:
Parking under direct sunlight for prolonged duration can result in high temperatures inside your car, which can damage your infotainment system, if used. So, before using the system let the car interior to cool down.

⚠️ WARNING:
Do not open the infotainment system as incorrect handling can damage the system. Further, warranty is void, if seal is broken.
SAFETY GUIDELINES

⚠️ WARNING:
Do not replace the vehicle speakers or fit additional speakers with after-market speakers. It may lead to the malfunctioning or even damage of the infotainment system.

⚠️ WARNING:
Do not apply sticky or strong alcohol-based spray, lotion or liquid on the infotainment system while cleaning the vehicle dashboard. This may cause permanent damage to the system button functions, knob operations or the display screen. It may also lead to the deterioration of the system paint.

⚠️ WARNING:
Usage of paint or color on the infotainment system can make the moving parts sticky and stop them from functioning correctly.

⚠️ WARNING:
Avoid addition of any accessories such as external amplifiers, which will lead to the modification of the standard factory wiring connections. As such unauthorized interconnections, can result in the malfunctioning of the infotainment system. Always contact the Tata dealer for changes to the vehicle or system.

⚠️ WARNING:
Ensure that any liquid does not enter the infotainment system, as it will lead to the failure of radio. The warranty of the system will be void, if liquid ingress marks are observed inside the system.

⚠️ WARNING:
Do not use excessive force while handling the infotainment system, USB slot, AUX-In slot and so on. It might cause damage to the system or component.
WARNING:
Avoid usage of hard or sharp objects like pen, key, USB stick etc. to touch the screen, as it can cause scratches on the screen surface.

WARNING:
Use a soft, clean and dry cleaning cloth to clean the touch screen surface. If required, use a lint-free cloth damped with a cleaning solution such as isopropyl alcohol, or an isopropyl alcohol and water solution ratio of 50:50. Be sure to follow the solvent manufacturer’s precautions and directions.

WARNING:
Avoid spraying or spilling of cleaning solutions, perfumes, car fresheners, beverages, caustic chemicals or any liquids on the touch screen surface, as it can damage the screen or the infotainment system.

TRADEMARKS

Apple, Apple CarPlay, Siri, iPod and iPhone are trademarks of Apple Inc., registered in the U.S. and Other countries.

Android and Android Auto are trademarks of Google Inc.
WARRANTY CLAUSES

The warranty clauses applicable to the infotainment system are listed below:

1. Warranty is applicable in India only.
2. Warranty for the product is against defective materials and manufacturing faults for 36 months / 60,000 km (whichever comes earlier) from the date of the first sale of vehicle.
3. Display and touch panel, if applicable to your system, are covered for 12 months from the date of the first sale of vehicle.
4. Warranty is expressly not applicable under the following conditions:
   - Where the product has been dismantled, repaired, altered, modified or damaged due to user negligence and misuse
   - The serial number of the product been removed, defaced or altered.
   - Warranty void sticker is removed or tampered
   - Improper usage such as wrong electrical supply/voltage setting causing damage to the equipment
   - Tampered or serviced or repaired by any agency not authorized by Tata Motors Limited.
INTRODUCTION

The CONNECTNEXT® infotainment system provides you with a bundle of high-end functionalities to:

- Manage in-vehicle entertainment capabilities
- Handle certain vehicle feature controls
- View information about some vehicle features

Key features of the infotainment system include:

- 7" inch WQVGA Touch Screen
- 4 Channel Audio
- AM and FM Tuner Bands with 20 station memories on each band
- Speed Dependent Volume Control
- Display OFF feature for distraction free night drive
- USB, iPod, Aux and Bluetooth Audio multimedia support
- Video Playback and Image Viewing support from USB sources
- Hands-free/Bluetooth support with advanced functions like ‘Set contacts as Favorite’ and ‘Reject with SMS’ for incoming calls

- Simultaneous pairing with multiple Phone handsets (up to 10 devices) through Bluetooth for Phone and Music supports like Phone book download & Audio streaming
- Integrated with vehicle components like Park Assist System and displays related information
- Vehicle feature control support like auto relock enable/disable and approach lights
- Infotainment system control from Steering Wheel.
- Smartphone or iPhone control from the vehicle infotainment system through Android Auto or CarPlay applications.

**NOTE:**

Some of the vehicle features like park assist system, Steering Wheel Controls (SWC), locking, and lighting are not standard in every vehicle variant. Features that are unavailable in the vehicle cannot be controlled using the infotainment system. Please refer to the Owner’s Manual of your vehicle or check with your vehicle dealer to confirm the list of features available in your vehicle.
CONTROL ELEMENTS OVERVIEW

The control elements, buttons and knobs, that are available on the infotainment system allows you to control the infotainment system. It provides you with quick and easy access to the commonly used functions and options of the infotainment system.

Figure 1: CONNECTNEXT® Infotainment System Home Screen in Day Mode

Figure 2: CONNECTNEXT® Infotainment System Home Screen in Night Mode
NOTE: The Day Mode feature uses a lighter background to increase user visibility which at times may be blocked due to sunlight. The Night mode uses a darker background with reduced brightness for a safe drive at night.

NOTE: All the images displayed in the manual are taken during the Night mode. In Day mode, the infotainment system displays similar functionalities with a lighter background.

|       |                  | - **Anti-Clock Wise:**
|       |                  |  - Decreases the volume. |
|       |                  | - **Short Press:**
|       |                  |  - *System Switch Off Mode*: System On |
|       |                  |  - *Media/Android Auto/CarPlay*: If Media OFF, Media ON. If Media ON, Mute/Unmute |
|       |                  |  - *Radio/AUX*: Mute/Unmute |
|       |                  | - **Long Press:**
|       |                  |  - *System Switch Off Mode*: System On |
|       |                  |  - *System in One Hour Mode*: System Off |
|       |                  |  - *Media/Android Auto/CarPlay*: Turns Media Off/Media On |

| 2     | Home button      | - **Short Press & Long Press:**
|       |                  |  - Displays home screen with current media/audio source playing in the background. |

**NOTE:**

During high priority activities like Park Assist and Active Phone Call, if the Home button is pressed, no action will be performed.
### Control Elements Overview

#### Introduction

**Favorite button**

This is a configurable button, which can be set as the shortcut for any of the below listed functionalities:

1. Source (Toggle)
2. Audio Setup
3. Favorites (Contacts)
4. Voice Command
5. Android Auto (if applicable)
6. CarPlay (if applicable)

- **Short Press**
  - Opens the currently configured shortcut. If no shortcut is configured, lists the configurable functionalities.

- **Long Press**
  - Displays the list of configurable functionalities or allows to set a different functionality as the shortcut.

SYSTEM USAGE

The menus and submenus in the CONNECTNEXT® infotainment system helps you to easily browse and access the various features and functions of the system.

CONNECTNEXT® HOME SCREEN

Access to any function/feature begins from the Home screen. The Home screen of the CONNECTNEXT® infotainment system is displayed after the Welcome screens. It has a list of shortcut menus and few widget drawers on it.
INTRODUCTION

MENUS

The system provides you with a list of 10 or 12 features/functions, depending on the availability of Android Auto/Apple CarPlay on your vehicle variant, which can be configured as shortcut menus. The menu shortcuts are listed in 3 screens. You can scroll through the menu screens by swiping left/right on the touch screen or using the left or right arrows on the screen.

Table 3: Configurable Shortcuts

<table>
<thead>
<tr>
<th>Function / Feature</th>
<th>Removable/Replaceable</th>
</tr>
</thead>
<tbody>
<tr>
<td>Android Auto</td>
<td>No, if available</td>
</tr>
<tr>
<td>Apple CarPlay</td>
<td>No, if available</td>

</tr>
</tbody>
</table>

NOTE:

The menu that is currently selected will be brighter. If a menu is selected but still grayed out, it indicates that the feature function configured to the menu is currently unavailable like phone/media source is not connected and so on.
INTRODUCTION

SYSTEM USAGE

NOTE:
Depending on vehicle variant, the
Android Auto and Apple CarPlay features
might be unavailable.

NOTE:
The sequence of the shortcuts can change
depending on the configuration of your
vehicle.

NOTE:
All menus in the Home screen, except the
Android Auto/Apple CarPlay shortcuts, if
available, can be replaced with menus of
other functions/features.

Creating shortcuts (Home Screen)
You can create shortcut menus for frequently used features
or submenu options. Only the menus in the first screen
(indicated with a Home icon below the menu list), can be
replaced or removed. When you remove the shortcut menu
of a function/feature on the Home screen, the system
displays a blank Add Shortcut icon in its place and the
removed menu is added to the last menu screen.

If you replace a shortcut menu with the shortcut of another
feature/function, the positions of the menus will be
interchanged. For example, if the Contacts menu is displayed
in the Home screen and the Phone menu is displayed in the
second screen. When you replace the Contacts menu with
the Phone menu, the system displays the Phone shortcut in
the Home screen and the Contacts shortcut in the second
screen.

To create a shortcut:
1. In the Home screen, tap on the blank Add Shortcut
   menu. The system displays the Add Shortcuts screen.
2. In the Add Shortcuts screen, navigate to and select the
   required function/feature for which you want to
   create a shortcut. The system assigns the access to the
   function/feature to the blank add shortcut menu and
   also displays the name and icon of the function/feature
   on the Home screen. You can now select the
   menu to access the function/feature.
NOTE:
If the number of shortcuts in the Home screen is 6, you will be unable to add a new shortcut. You need to either remove or replace an existing shortcut to add a new shortcut.

Removing/Replacing a Shortcut

To remove/replace a shortcut:

1. In the Home screen, Long Press on the shortcut menu that must be replaced or removed. The system prompts you to confirm whether you want to ‘Replace’ or ‘Remove’ the shortcut or completely ‘Cancel’ the action.
2. To remove the shortcut, select the Remove icon.
3. To replace the shortcut with another function/feature, select the Replace icon. The system displays the...
Configure Shortcuts screen with the list of functions/features that can be configured.

4. Select the required function/feature from the list. The system assigns the selected function/feature to the replaced shortcut menu and also displays the name and icon of the function/feature on the Home screen. You can now select the menu to access the function/feature.

⚠️ **NOTE:**

Only shortcuts that have been assigned to a feature/function can be removed or replaced. The Add Shortcut menu, if available cannot be removed.

⚠️ **NOTE:**

The system only removes the shortcut. The feature or function that was previously assigned to the shortcut menu will still be available in the system. You will be able to access the feature/function using an alternate way. Refer to the section of the feature/function to identify the alternate way of access.

**NOTE:**

The deleted shortcut menu will be replaced with 📩.

If the Android Auto/Apple CarPlay shortcuts are available on the Home screen, you cannot delete the shortcuts.

**WIDGET DRAWERS**

The Widget Drawers on the Home screen and other screens display shortcuts to individual functions such as Status Drawer, connected phone status, or details of a specific feature like HVAC, Media and so on.

The display screen of the infotainment system has 3 information areas:

1. Notification Bar
2. Right Drawer
3. Left Drawer
When you tap on a drawer, it expands and provides more options for managing the feature or displays more function/feature related details.

**NOTE:**
- The Notification Bar and Home widget cannot be expanded.

**NOTE:**
- The Notification Bar is located at the top of the infotainment screen.

The bar displays the following details:
1. Current time
2. Mute icon, if the system volume is set to mute
3. Connected Phone battery and network status
4. Climate settings like temperature status, Fan Speed and HVAC
SYSTEM USAGE

In following few instances, the display in the Notification Bar changes:

1. **Voice Command**: When Voice Command is activated, either through the Infotainment System or the Steering Wheel button. Depending on the next voice command executed, the respective screen will be displayed.

2. **Notification**: When a notification is being displayed, the change is relayed in the notification bar.

**Left Drawer**

The Left Drawer of the infotainment screen displays the following details:

1. Status Drawer
2. Connected Phone status

**Status Drawer.** The Status Gear drawer is located at the left corner of the Home screen.

![Figure 11: Status Drawer Expanded Mode]

When you tap the Status drawer, it is expanded and the different settings in the drawer listed below are displayed:

**Table 4: Status Drawer Expanded Mode Settings**

<table>
<thead>

**CONNECTED PHONE STATUS:** The Connected Phone Status drawer is located at the left corner of the Home screen. This drawer displays the currently connected smartphone.

When you tap ***depending upon the connected Android phone or iPhone, the Connected Phone drawer displays the Android Auto/ Apple CarPlay/BT connection.***
SYSTEM USAGE

Right Drawer

The Right Drawer of the infotainment screen displays the following details:

1. HVAC
2. Park Assist
3. Source Drawer
4. Home

HVAC. When you tap HVAC, the system displays the different Climate Control setting options like temperature, blower speed, ECON toggle switch and so on, which are used for managing the Climate Control of your vehicle.

For information on the various climate settings, refer to “HVAC Control Elements” section.

PARK ASSIST. When you tap Park Assist, the system displays the Park Assist Setup screen and you can manage the Park Assist system settings. The Park Assist feature is vehicle dependent.

For information on the various park assist settings, refer to the “Manage Park Assist (if Applicable)” section.

SOURCE DRAWER. The Source drawer is located at the right corner of the Home screen. This drawer displays the media source indicator icon.

When you tap the Source drawer, it is expanded and the different audio sources available for your vehicle will be listed. When you select an audio source from the list, the selected source screen will be displayed.

Figure 13: Source Drawer
When you tap the Home widget, the system returns to the Home Screen and its options from any screen of the infotainment system.

**Navigating Between the Home Screen Menus**

You can navigate between the Home Screen menus using the Touch Screen. The list of menus are displayed in 2 or 3 screens.

To browse through the menu screens:

**Using Touch Screen:**

![Figure 14: Swiping of Home Screen Menus](image)
SYSTEM USAGE

- Swipe on the screen in a clock-wise or anti-clockwise direction with your finger.

or

- Tap on the or arrows on the display screen.

NAVIGATING BETWEEN ON-SCREEN OBJECTS

The on-screen objects of the infotainment system like, menus, icons and so on can be accessed using the Touch Screen.

Selecting an On-Screen Object

You can select an on-screen object to:

- display the corresponding submenu of the selected menu.
- display a popup with information/message.
- activate the function corresponding to the selected icon/menu.
- select or deselect a check box or a option icon.

Using Touch Screen:

- Tap on the on-screen object.

Scrolling Through a Menu List

When there are many menu options, the system:

- displays a scroll bar beside the options.
- displays arrows on the left & right/top & bottom of the options.
**System Usage**

**Using Touch Screen:**

- Move the slider of the scroll bar up & down or left & right with your finger.

  or

- Tap on the ▲, ▼, ◀ or ► arrows on the display screen.

**Figure 16: Moving Slider/Tapping Arrows**

**Modifying the Value in a Range**

**Using Touch Screen:**

- Tap on the + screen icon to increase the value or - screen icon to decrease the value.

**Figure 17: Increasing/Decreasing Values**

**Going to the Parent Menu from a Submenu**

- Tap the ◄ icon on the infotainment system to display the parent menu of the currently active submenu.
SYSTEM USAGE

Identifying the Currently Active Menu from the Display Screen

The display screen of the infotainment system has 4 information areas.

1. **Notification Bar:** Displays the feature/media source/menu option/submenu option name, and HVAC details.

2. **Active Area:** Displays submenu options, information or progress of the currently selected menu function/feature.

3. **Left Drawer:** Displays the Status drawer.

4. **Right Drawer:** Displays the HVAC, Park Assist, connected media sources details and Home.

Handling Popups

The infotainment system displays popups to:

- indicate progress of an activity - will disappear once the activity in progress ends.
- display important messages regarding system or the currently active feature - will disappear automatically after the pre-configured timeout period.
- prompt you to confirm an action before performing it -
  - will not disappear until an action is taken.
  - will automatically disappear, if no action is taken within a predefined time period.

![Sample Display Screen](image-url)
GETTING STARTED

To use the CONNECTNEXT® infotainment system, you must first switch it ON.

When the vehicle ignition is switched ON and the infotainment system is switched ON, the system will be in the **System Switched ON (Active) Mode**.

SYSTEM ON/OFF

1. To switch the infotainment system ON/OFF, press the knob.

When you switch ON the vehicle ignition, the system is automatically switched ON and the audio source that was active before system switch OFF is reactivated. Even if the system was switched OFF using the knob, the system will automatically switch ON, when the vehicle ignition is switched ON.

If the vehicle ignition is switched OFF and the key is removed, the system will switch OFF. The system will now be in the **System Switched OFF Mode** and no functions will be available.

When the vehicle ignition and the infotainment system are switched ON and you press the knob, the system will stop the currently playing media source or radio. The system will now be in the **Media Switched OFF Mode** and will display the system time and date.

All entertainment functions (Media/Radio) will be unavailable in this mode. Only Phone and display functions like HVAC and Park Assist will be active.
SYSTEM ON/OFF

When the vehicle ignition is switched OFF, you can switch ON the infotainment system by pressing the knob and the system will be available for the next one hour. This is called the One Hour System Switched ON Mode.

Only Phone and entertainment functions (Media/Radio) will be available in this mode. After an hour, the system will be automatically switch OFF. If an active phone call is in progress, the system will not be automatically switched OFF after an hour. The system will be switched OFF, after the active call ends.

You can also switch off only the display of the infotainment system. In the Display OFF Mode, the currently played media source and other background functions will continue. To activate Display OFF Mode, in the Home screen, select the option. Refer to "Source Drawer" for information on selecting the Display OFF menu option.

When you receive a call, insert a media source, initiate park assist or any message popup is displayed the system stops display off and performs the required action. If no action, like switching on of display or selection of a menu/submenu, is initiated the system will automatically turn off display after 20 seconds. If you perform some action within the time period, the automatic turning off of display is postponed to another 20 sec.

NOTE:
During high priority tasks like active call, and PDC, the automatic Display OFF is postponed till the task is completed.
MANAGE GENERAL SETTINGS

To handle the general CONNECTNEXT® infotainment system settings like, date and time:

1. Tap The system displays the Setup options.
2. Navigate to and select the General Setup option. The system displays the various options for setting the basic system parameters.

⚠️ NOTE:
The language used in the infotainment system is English. Other languages are not supported.

SETTING DATE

To set the system date:

1. In the General Setup options, navigate to and select the Set Date option. The system displays the Set Date screen.
2. In the Set Date screen, highlight the day (DD) field and select the required day value.
3. Highlight the month (MM) field and select the required month value.
MANAGE GENERAL SETTINGS

4. Highlight the year (YYYY) field and select the required year value.
5. When the required date is selected, select the Set icon. The selected date is set as the system date.

⚠️ NOTE:
You can scroll through the values of day, month and year in the number lists by either using manual touch scrolling or up/down arrows.

Figure 21: Set Date Screen

SETTING TIME

To set the system time:

1. In the General Setup options, navigate to and select the Set Time option. The system displays the Set Time screen.
2. In the Set Time screen, highlight the hour field and select the required hour value.
3. Highlight the minutes field and select the required minute value.
4. Highlight the time period (AM/PM) field, select the required time period value.

⚠️ NOTE:
The Time Period option will be available only if the ‘Use 24 Hour Format’ option is not set.
5. When the required time is selected, select the Set icon. The selected time is set as the system time.

Changing the Time Format

By default, the infotainment system clock displays time in 12 Hour format. To change it to the 24 Hour format:
1. In the **General Setup** options, navigate to and select the **Use 24 Hour Format** option. Select the check box beside the option and the system clock displays time in the 24 hour format.

**NOTE:**
To change back to the 12 Hour format, clear the ‘Use 24 Hour Format’ check box.

**RESET TO FACTORY DEFAULT**

You can reset the infotainment system to the factory settings i.e default settings. This option is mainly useful when you are giving your vehicle to someone for temporary usage or when you are selling your vehicle.

When you reset the system to factory settings, the following changes will be made:

- All Setup settings like volume, audio and so on, which were changed by the user will be restored to default.
- All Bluetooth devices will be disconnected and paired devices will be deleted.
- All media source details stored in the system will be cleared.
- All user saved/configured settings like phone favourites and so on will be cleared.
- All the Radio stored presets will be cleared and the currently played frequency will be reset to the default frequencies i.e. FM -87.5 MHz and AM -531 kHz.

**NOTE:**
Irrespective of the media source that was last played, after Reset to Factory, when you select Media, the Radio (FM) will be played by default.

To reset the system to factory default settings:

1. In the **General Setup** options, navigate to and select the **Reset to Factory Defaults** option. The system prompts you to confirm whether you want to continue with the reset or not.
2. Click **Yes**, the system initiates the restoring to factory default settings action. The media source/radio that is currently playing will be stopped. Phone will be disconnected.

Once the reset is completed, the system prompts you to switch OFF the infotainment system, switch OFF ignition. The reset action is completed, when you
insert the key again (after 10 seconds at least) and switch ON the ignition and the infotainment system.

⚠️ **NOTE:**
You will not be able to initiate reset to factory default when the vehicle is in the One Hour System Switched ON Mode. However, if you switch OFF ignition while the reset is in progress, the system completes the reset operation in the One Hour System Switched ON Mode.

![Figure 22: Reset to Factory Defaults Message Popup](image)
CHANGE AUDIO SETTINGS

To change the audio settings:

1. Tap \( \text{Set} \) The system displays the Setup menu options.
2. Scroll to and select the Audio Setup option. The system displays the various options for setting the audio parameters.

\[ \text{NOTE:} \]

The audio settings are common to all media sources.

SETTING BASS, MIDDLE AND TREBLE VALUES

Bass: Increase or decrease the gain of low frequencies of the audio sources.

Middle: Increase or decrease the mid frequency of the audio sources.

Treble: Increase or decrease the high frequencies of the audio sources.

To set the bass, middle and/or treble values:

1. In the Audio options, navigate to and select the Bass, Middle & Treble option. The system displays the Bass/Middle/Treble screen.
2. In the Bass, Middle & Treble screen, modify the settings of the required fields, by setting them to new values in the range of -10 to +10.

\[ \text{NOTE:} \]

The default values of Bass, Middle and Treble fields are 0.

Figure 23: Bass, Middle & Treble Screen
GETTING STARTED

CHANGE AUDIO SETTINGS

SETTING BALANCE AND FADER

Balance: Change this value to set the volume distribution between the left and right speakers of the vehicle.

Fader: Change this value to set the volume distribution between the front and rear speakers of the vehicle.

To set the balance and/or fader values:

1. In the Audio Setup options, navigate to and select the Balance & Fader option. The system displays the corresponding screen.
2. In the Balance & Fader screen, modify the settings of the required fields, by setting them to new values in the range of -5 to +5.

\[\text{NOTE:}\]

The position of the symbol indicates the current volume distribution between the different speakers of the vehicle.

\[\text{NOTE:}\]

The default values of Balance and Fader fields are 0.

Distributing Volume Only to Front Speakers

1. In the Balance & Fader screen, select the Driver icon. The system distributes volume only to the front speakers.

Figure 24: Balance & Fader Screen

Distributing Volume Only to Rear Speakers

1. In the Balance & Fader screen, select the Rear icon. The system distributes volume only to the rear speakers.
**Resetting Fader Settings**

1. In the Balance & Fader screen, select the **Reset** icon. The system resets the current fader value to equally distribute volume to both front and rear speakers.

2. Scroll to and select your favorite option. The system automatically changes the audio settings depending on your selection.

**Selecting an Audio Preset/Equalizer**

The infotainment system enables you to automatically change the audio settings depending on your favorite type of music. The preset options that are available to you are:

- Classic
- Pop
- Jazz
- Rock
- Flat
- Speech
- User

To change the audio settings to match your favorite type of music:

1. In the **Audio Setup** options, navigate to and select the Audio Preset option. The system displays the available audio preset options.
GETTING STARTED

CHANGE VOLUME SETTINGS

To handle the volume settings of the vehicle and the various features of the infotainment system:

1. Tap \( 
\)
The system displays the Setup menu options.

2. Navigate to and select the Volume Setup option. The system displays the Volume Setup screen with various options for setting the volume of the vehicle or other system features.

---

SETTING SPEED DEPENDENT VOLUME

DEFINITION:

When the vehicle speed increases, the engine noise and surrounding noise like wind sound increases. The Speed Dependent Volume feature adjusts the audio volume of your system with the speed of the vehicle. This allows you to feel that the music is played at the same volume.

To enable the speed dependent volume:

1. In the Volume Setup screen, navigate and select Speed Dependent Volume.

SETTING PHONE AUDIO VOLUME

This option sets the in-call volume of the connected phone.

To set the phone audio volume:
1. In the Volume Setup screen, highlight the **Phone Audio** field, modify the settings of the field by setting it to a new value in the range of 0 to 30.

**SETTING START UP VOLUME**

![DEFINITION:]

StartUp volume is the audio volume at which your music will be played, when the system is switched ON with the vehicle ignition switch ON.

To set the startup volume of the system:

1. In the Volume screen, highlight the **Start Up** field, modify the settings of the field, by setting it to a new value in the range of 5 to 20.

![NOTE:]

At system startup, if the system volume is higher than the startup volume, the lower of them will be set as the volume.

**SETTING SMS READ OUT VOLUME**

This option sets the volume at which your SMS will be read out to you.

1. In the Volume screen, highlight the **SMS Read Out** field, modify the settings of the field, by setting it to a new value in the range of 0 to 30.

**SETTING VOICE COMMAND VOLUME**

This option sets the volume that will be applicable to the voice recognition feature.

1. In the Volume screen, highlight the **Voice Command** field, modify the settings of the field, by setting it to a new value in the range of 0 to 30.

**SETTING THE AUX-IN GAIN**

The infotainment system acts as the amplifier for the audio output from the Auxiliary devices. You can set the audio output amplification level to Low, Mid (medium) or High.

To set the audio amplification level:
1. In the Volume screen, highlight the **Aux-In Gain** option. The system displays the available amplification level options.
2. Navigate to and select the required amplification level.
SOFTWARE DETAILS

You can view the details of the infotainment system software like version and date of update. This option is mainly useful when you want to upgrade the system software or verify after upgrading the software.

To view the software details:

1. Tap the icon. The system displays the Setup menu options.
2. Navigate to and select the Software Details option. The system displays the Software Details screen with the Software Version and Last (software) Updated details.
3. After reading the details, tap the icon to go back to the Setup screen.
RADIO

The CONNECTNEXT® infotainment system supports FM and AM radio bands.

AM/FM RECEPTION LIMITATIONS

Some AM/FM signal reception limitations of the system are listed below:

1. The AM/FM signal reception of the system does not cover long ranges. If your vehicle leaves the transmitter range, the sound quality will become poor and there may be noise interferences.
2. The AM/FM signal cannot pass through hills and tall buildings. If vehicles enter such areas, the reception will be poor or there might be no reception at all.
3. The AM/FM signal reception quality might deteriorate with multi path effect, which results due to signal reflections from hills and tall buildings.

OVERVIEW

To view the radio screen, perform any of the following:

- Scroll to and tap  on the infotainment system Home screen, if available
- Open the Sources screen and tap the FM/AM icon.

Figure 27: Sources Screen
Figure 28: Radio Screen

</tbody>
</table>
RADIO OPERATIONS

The system allows you to perform the following radio operations:

- Changing the radio band
- Tuning radio stations
- Handling presets
- AutoStore
- Scan

CHANGING THE RADIO BAND

To change the radio band:

1. In the Radio Screen, tap the Source. The various media sources that can be connected with the infotainment system are listed in the screen.
2. Select the required radio band (AM/FM). The system displays the details of the selected radio band.

INCREASING/DECREASING RADIO VOLUME

Rotate the knob clockwise/anti-clockwise to increase or decrease the volume.

TUNING RADIO STATIONS

The infotainment system supports Manual tuning as well as Auto tuning of radio stations.

Manually Tuning a Radio Station

To manually tune radio stations in the Radio screen:

1. Swipe the frequency slider left or right to tune to the previous/next valid station Or tap the left or right corners of the slider.

Figure 29: Radio Stations Manual Tuning
**Auto Tuning a Radio Station**

To auto tune radio stations:

1. In the Radio screen, tap **عكس** or **進め** icons. The system will automatically tune to the previous/next valid radio station by increasing or decreasing the frequency and start playing it.

**Stopping Auto Tuning**

The system automatically stops the Auto Tuning action, when it reaches the previous/next receivable frequency or when the search is unsuccessful.

To stop the auto tuning action manually:

1. Tap anywhere on the slider.

**Scanning Radio Stations**

**DEFINITION:**

You can scan through the available radio stations, when you are not sure of the station you want to hear. While scanning, the system plays each receivable station for 10 seconds. You must stop the scanning to continue listening to a station.
RADIO OPERATIONS

To scan through the radio stations:

1. In the Radio screen, tap Option icon. The system displays Auto Store and Scan options.
2. Tap Scan. The system tunes to the next receivable station and plays it for 10 seconds. The scanning will continue until canceled (displayed at the right corner) or till it reaches the initial frequency from where the scanning was initiated.

![Figure 31: Radio Stations Auto Scanning](image)

**NOTE:**
You can store the currently played station in any preset (1 to 20) by long pressing the required preset number icon from the list of preset icons displayed on the screen. Refer to the “Handling Presets” section for information on presets.
HANDLING PRESETS

DEFINITION:
You can store a radio station in the system memory as a Preset, which helps quick access of the station.

The infotainment system supports 20 presets per radio band.

Storing Presets

To store a tuned frequency (radio station) in a preset:

1. In the Radio screen, long press the required preset number (1 to 20) on the screen.

Auto Storing Presets

DEFINITION:
The infotainment system allows you to automatically search and store available radio stations as presets. When initiated, the Auto Store feature stores the available stations, in the ascending order of their frequency, in the presets.

To enable auto search and storing of presets:

1. In the Radio screen, tap the Option icon. The system displays Auto Store and Scan options.
2. Tap Auto Store. The system searches for the available radio stations and when found stores them as presets for the current radio band (AM/FM). When radio stations are stored in all presets or if there are no more available stations, the system stops the automatic storing action.

Playing a Preset

To play a radio station stored as a preset:

1. Tap . The system displays the Radio screen.
2. Change to the required radio band, if not already displayed.
3. Navigate to and select the corresponding preset.
NOTE:

You can also play a preset by browsing through the available presets list and selecting the required preset. Refer to the “Browsing Through the Presets” section for information on browsing through the presets list.

BROWSING THROUGH THE PRESETs

To browse through the preset list:

1. In the Radio screen, select the Preset Browse icon. The system displays the Preset screen with the list of presets. You can view the different presets by navigating through the list using the scroll bar beside it.
MEDIA

The CONNECTNEXT® infotainment system supports the following media sources to play music and videos:

1. USB source
2. Bluetooth Audio source
3. iPod
4. Audio AUX-In source

The supported audio formats aac, .mp3, .wav and .wma.

The supported video formats are .mp4 and .avi.

**NOTE:** Video playbacks are supported from USB source only.

Figure 32: Sample Media Screen - USB Source
NOTE:
The Folder Next and Previous icons are available only for the USB media source, which have media content stored in folders. The icons will unavailable for iPod, Bluetooth and AUX-In media sources.

Figure 33: Sample Media Screen - BT Source
NOTE:
For Bluetooth media source devices, the Media screen options will vary depending on the AVRCP version of the device. For devices with AVRCP 1.6, all screen options listed in the table, except the folder options (5 and 6) will be available in the Media screen. For devices with AVRCP 1.3 and above, the system displays the device name, the current active track name, a default track image and the play/pause icon. Additionally, the random and repeat features are also supported in AVRCP version 1.3 and above. For devices with AVRCP below 1.3, the system only displays a message “Playing from phone” and the play/pause icon. Please note that behavior of Bluetooth profiles can vary from device to device. Please check your phone user manual for more details.
PLAYING A MEDIA SOURCE

The infotainment system allows you to play a media source type by using anyone of the following ways:

- By inserting/connecting a media source device to the system
- By selecting a media source type from the Sources
- By a shortcut menu configured for the media type
- By configuring and using
- By using the Voice Command

⚠️ NOTE:

Depending on the content and device type, some media source devices might take more time to start.

CONNECTING TO A MEDIA SOURCE

The USB, iPod or Auxiliary media devices must be physically connected to the system for them to be recognized and accessed. Refer to your vehicle Owner's Manual for information on how to connect the USB and Auxiliary devices.

⚠️ NOTE:

USB devices with up to 32 GB of memory are supported by the system.

Bluetooth devices do not require any physical connection with the system. Once you enable Bluetooth feature in the media device and the system, both the devices can be connected and paired with each other.
PLAYING A MEDIA SOURCE

If the system is switched OFF, it stops playing the source. Once the system is switched ON again and if the source is still connected, the system starts playing music from where the source was stopped.

NOTE:
For good audio quality, music tracks recorded at 192 kbps or above are recommended for playing in the system. If tracks recorded at lower rates are played like around 128 kbps, there will be noticeable difference while listening.
PLAYING A MEDIA SOURCE

SELECTING A MEDIA SOURCE

When multiple media sources are connected to the infotainment system or to play a particular media source that was stopped earlier, you can select the required source from the list of available Media Sources.

To select the required media source:

1. Tap . The system displays the Media screen and plays the track that was played last, if the source is still connected.

   **NOTE:** is a configurable menu and the above step is applicable only if you have configured the menu for Sources.

2. In the Home screen, tap Source . The system displays the media sources. Select the required currently available media source. The system plays music track from the selected source.

   **NOTE:**

   The Sources screen is available from any screen on the infotainment system.

   Only sources that are currently connected to the infotainment system can play when selected. The sources that are highlighted in the sources screen are currently available for playing.

   ![Figure 35: Media Sources Screen](image)
If you have configured a shortcut in the Home screen for one or more media sources, you can play the required media source by navigating and selecting the required media option from the Main Menu. Refer to the “Creating shortcuts (Home Screen)” section, for the steps involved in creating shortcuts for the various media sources and the “Navigating Between the Home Screen Menus” section to understand how to select a Main Menu.
MUSIC RELATED FUNCTIONS

The infotainment system allows you to perform the following music related operations:

- Play/pause music
- Increase/decrease/mute volume
- Repeat music track
- Randomly play music tracks in a folder/media source
- View next/previous music track names
- Play next/previous music tracks
- Perform Fast Forward/Fast Rewind
- Play next/previous folder
- Browse through the music content
- Scan through the music content

**NOTE:**
When the media is mute, play/pause actions will not unmute the media.

PAUSING/PLAYING MUSIC

Using the system, you can playback a maximum of 15000 music files.

To pause playing of music:

1. In the Media screen, tap the Pause icon on the screen.
   The system pauses the playing music and the icon changes to Play icon.
   Repeat the step to resume playing the music.

**NOTE:**
If the system comes across a corrupt music track in your media source, the system tries to play the track and after 2 seconds automatically moves to the next music track in the media source.

HANDLING MUSIC VOLUME

The infotainment system allows you to:

- Increase/decrease the volume of the music
- Mute/Un-mute the volume
**MEDIA**

**MUSIC RELATED FUNCTIONS**

*Increasing/decreasing volume*

To increase/decrease the volume of the music:

1. Rotate the knob clockwise/anti-clockwise to increase or decrease volume.

**NOTE:**

You can also use the and Steering Wheel control elements to increase/decrease the volume.

*Muting/un-muting volume*

To mute/un-mute volume:

1. Press the knob. The system mutes the volume. Repeat the step to unmute the volume.

**NOTE:**

You can also press the Steering Wheel control element to mute volume.

---

**REPEATING TRACK**

You can either repeat a single track or repeat music tracks in a folder.

To repeat a track or tracks in a folder:

1. In the Media screen, tap the **Switch On/Off Repeat** icon. The system repeats the current track and displays a ‘1’ above the Repeat icon to indicate the action. When you tap the icon again, the system repeats all the songs. In case of USB, by default the system repeats all the songs. In case of iPod and BT audio, you can also switch OFF repeat.

**NOTE:**

For some Bluetooth audio devices, all repeat functions may not work. The availability of these functions is dependent on the AVRCP version of your device.

**NOTE:**

For iPod devices, you can repeat only the tracks in the device.
MUSIC RELATED FUNCTIONS

**NOTE:**
The repeat functionalities are not supported for the AUX-In music sources.

**PLAYING TRACKS RANDOMLY**

You can enable the system to randomly select and play music tracks available in a folder or all music tracks in the media source, instead of playing them in the sequence in which they are stored.

To randomly play music tracks:

1. In the Media screen, tap the **Switch On/Off Shuffle** icon. The system randomly plays all tracks in the current folder or all music tracks in the media source. If you tap the icon again, the shuffle action is stopped.

**NOTE:**
For iPod devices (Apple devices), you can randomly play all tracks only in the music source device.

**NOTE:**
For some Bluetooth audio devices, all random functions may not work. The availability of these functions is dependent on the AVRCP version of your device.

**NOTE:**
The shuffle functionalities are not supported for the AUX-In music sources.

**PLAYING NEXT/PREVIOUS MUSIC TRACKS**

When in a music track, the system allows you to play the next/previous music tracks.

To play the next/previous music tracks:

1. From within the Media screen, Short Press the **Next Track** icon or the **Previous Track** icon to play the next or previous track respectively. The system plays the next/previous track.
MEDIA

MUSIC RELATED FUNCTIONS

NOTE:
You can also Short Press the and the Steering Wheel control elements to play the previous or next music track respectively.

NOTE:
The next/previous music track functionalities are not supported for the AUX-In music sources.

NOTE:
For some Bluetooth audio devices, the playing next/previous music tracks functions may not work. The availability of the function is dependent on the AVRCP version of your device.

PERFORM FAST FORWARD/FAST REWIND

You can fast forward or fast rewind the music tracks to quickly complete playing them and move ahead or backward in the folder.

To fast forward or fast rewind:

1. From within the Media screen, Long Press the Next Track icon or the Previous Track icon. The system fast forwards or fast rewinds the music tracks until the icon is released and the action is stopped. The system plays the music track that is in focus when the action is stopped.

NOTE:
The fast forward/ fast rewind of music tracks functionalities are not supported for the AUX-In music sources.

NOTE:
The fast forward/fast rewind operation response depends on the Bluetooth Device response.

PLAYING NEXT/PREVIOUS FOLDER

When in a music track, the system allows you to shift to the next/previous folder and play the music tracks in them.

To shift to the next/previous folder:
MEDIA

1. When in the Media screen, tap the Folder Up or the Folder Down icon to shift to the next or previous folder respectively. The system plays the first music track in the selected folder.

**NOTE:**
You can also long press the and the Steering Wheel control elements to play the previous or next folder respectively.

**NOTE:**
The next/previous folder functionalities are not supported for the iPod (Apple devices) devices, Bluetooth devices and AUX-In music sources.

**BROWSING THROUGH THE MEDIA CONTENT**

You can perform a category based browsing of media content stored in a media device.

**NOTE:**
The types of categories supported will depend on the Media source/device.

**NOTE:**
The system supports limited browsing of Bluetooth media source devices with AVRCP 1.4. Devices with lower AVRCP versions cannot be browsed.

To browse through the media content:

1. In the Media screen, tap the Browse icon. The system displays the Browse screen with applicable categories list.
2. Select the required category from the list. The system displays the music tracks grouped under the selection.
3. From the available music tracks, chose the required music track. The system plays the selected music track.
You can scan through a USB/iPod media device for the required music track.

To scan through a media device:

1. When in the Media screen, tap the **Settings**. The system displays the list of applicable options.
2. Navigate to and select the **Scan** option. The system displays the Scanning in progress screen and plays each track until the scanning is stopped for 10 seconds. The name of the currently played track is also displayed in the screen.

**NOTE:**
If you browse to a category and then initiate the scan, only the tracks in the selected category will be scanned.

**NOTE:**
You can cancel the scanning process to play a track completely.

---

**SCANNING THROUGH THE MEDIA DEVICE**

**DEFINITION:**
When you are unsure of the music track you want to hear, you can scan through the tracks on your media source. While scanning, the system plays each track for 10 seconds. You must stop the scanning to continue hearing to a track.
MUSIC RELATED FUNCTIONS

Stopping Media Device Scanning

To stop scanning of the media device:

1. In the scan screen, select **Cancel**, using the knob. The system stops scanning the media device and starts playing music from the current music track.
PICTURE VIEWER

If your USB media device has picture files, you can view them in the infotainment system. The system supports viewing of JPEG, BMP and PNG picture file formats.

ACCESSING THE PICTURE FILES

You can view picture files by using the picture viewer feature of the infotainment system. The feature is unavailable when the vehicle is in motion. While driving, if you select a picture file, the system displays a popup message warning you not to open picture files while driving.

While viewing picture files, if you start and drive your vehicle, and the vehicle reaches a speed of 5 km/hr or more, the system closes the picture viewer and displays a popup message indicating that the picture viewer is unavailable at high speed.

You can access the picture files by selecting anyone of the following options:

1. **When there are no audio files and only picture files exist in the media device:**

   1. When you insert the media source, the system displays a popup message informing you that there are no audio files and prompting you to confirm whether you want to view the pictures.
   
   ![Figure 37: Popup Message when no Audio file exists](image)

   2. Select Yes. The system will start displaying the pictures.

2. **When there are video files and picture files in the media device:**

   1. When you insert the media source, the system displays a popup message informing you that there are video files and picture files, and prompting you to confirm whether you want to view the pictures.

   ![Figure 37: Popup Message when no Audio file exists](image)
PICTURE VIEWER

2. Select Yes. The system will start displaying the pictures.

3. In the Picture Display screen, touch the Browse icon. The system displays the list of picture files available in the connected media source.

![Figure 38: Picture Display Screen with Options](image)

4. Tap ▼. The system displays the media Browse screen with applicable categories list.

![Figure 39: Media Browse Screen with Videos and Pictures only](image)

**NAVIGATING BETWEEN PICTURES**

The system facilitates viewing of the pictures files in a sequence, one after the other.

To view pictures in a sequence:

1. In the Picture Display screen, touch the picture. The system displays multiple options.

2. Tap the ▬ and ▶ arrows to move to the previous or next picture in the media source.
NOTE: Refer to the Accessing the Picture Files section for steps on displaying the Picture screen.

NOTE: Large pictures can take some time to display.

NOTE: Pictures larger than 8 megapixel will not be displayed in the system.

CLOSING A PICTURE

To close display of a picture:

1. Touch the picture. The system displays the icon at the right corner of the screen along with navigation arrows.
2. Tap the icon to close the picture. The system displays the Media main screen or the previous media source screen (in case of USB with only images).

SHIFTING TO VIDEO PLAYBACK OR MEDIA SCREEN

If the media source contains video files also, you can view the video files using the Video Playback feature. If the media source contains audio tracks also, you can play, browse and manage the tracks using the Media screen.

To shift to the video playback feature from within the Picture Viewer feature or from any of the Media screens:

1. Touch the Browse icon from within the Picture/Media screen. The system displays a media Browse screen.
2. In the Browse screen, select Videos. The system displays the Video screen with the list of video files or the category screen with the list of audio tracks in the media device.
VIDEO PLAYBACK

If your USB media device contains video files, you can play them in the infotainment system. The system supports playback of .mp4 and .avi video file formats.

ACCESSING THE VIDEO FILES

You can view videos by using the video playback feature of the infotainment system. The feature is unavailable when the vehicle is in motion. While driving, if you select a video file, the system displays a warning message informing you not to open video files while driving.

While playing video files, if you start and drive your vehicle and the vehicle reaches a speed of 5 km/h or more, the system closes the video playback screen and displays a popup message indicating that the video playback is unavailable at high speed.

You can access the videos by selecting anyone of the following options:

1. When there are no audio files and only video files exist in the media device:
   1. When you insert the media source, the system displays a popup message informing you that there are no audio files and prompting you to confirm whether you want to view the videos.
   2. Select Yes. The system displays the list of available videos.
   3. Navigate to and select Videos. The system plays your favorite video on the infotainment system screen.

2. When there are both audio files and video files in the media device:
   1. When you insert the media source, the system automatically starts playing the audio tracks in the device. To view videos, in the Media Screen, tap the Browse icon. Navigate to and select Videos option. Refer to the "Browsing Through the Media Content" section for the steps to display the Browse screen.
VIDEO RELATED OPERATIONS

The system allows you to perform the following operations on the video files:

- **Play/pause video**
  
  The steps for playing or pausing videos is similar to playing or pausing of music files. Refer to the Pausing/Playing Music section for the steps to pause or play a video.

- **Handle video volume**
  
  The steps for handling the volume of your video is similar to handling the volume of your audio. Refer to the Handling Music Volume section for the steps to handle the volume of your video.

- **Repeat a video**
  
  You can reset/drag the progress bar to the start position to repeat a video.

- **Play next/previous video**
  
  The steps for playing the next or previous video is similar to playing the next or previous music file. Refer to the Playing Next/Previous Music Tracks section for the steps to play next or previous video.

- **Perform Fast Forward/Fast Rewind of videos**
  
  The steps for performing fast forward or fast rewind of a video is similar to performing fast forward or fast rewind of music tracks. Refer to the Perform Fast Forward/Fast Rewind section for the steps to fast forward or fast rewind a video.

  **NOTE:**
  
  The fast forward/fast rewind is supported up to 4x speed only.

- **Browse through videos**
  
  The steps for browsing through the video files in a media source is similar to browsing through other media content. Refer to the "Browsing Through the Media Content" section for the steps to browse through video files.

GOING TO THE HOME SCREEN

To open the Home Screen from within a video playback:

1. In the Video Playback screen, tap the Home button. The system continues the video in the background and displays the Home Screen.

NOTE:

To return back to the Video Playback screen, click the Media menu option or the paused video file name below it.
CLOSING A VIDEO

To stop and close a video:

1. Tap on the video. The system displays the icon at the left corner of the screen.
2. Tap the icon to close the video. The system closes the video playback screen and displays the previously played media source screen.

SHIFTING TO MEDIA SCREEN

If the media source contains audio tracks also, you can play, browse and manage the tracks from the Media screen.

To shift to the Media screen from within the Video Playback feature:

1. Tap the Browse icon from within the Media screen. The system displays a media Browse screen.
2. In the Browse screen, select the required audio category. The system displays the category screen with the list of audio tracks in the media device.
PHONE

Using the Bluetooth capability, you can pair and connect your phone to the CONNECTNEXT® infotainment system. Once both the devices are connected you can:

- Access the phone contents like contacts, call logs, music and so on through the system.
- Make or attend phone calls even while driving through the infotainment system hands-free capability.

NOTE:
Few mobile phones may not support all the phone related features of the infotainment system. It is recommended that you refer to the user manual of your mobile phone to understand its Bluetooth and other capabilities.

ENABLE BLUETOOTH

To connect your cell phone to the infotainment system:

1. Turn ON the Bluetooth capability and device visibility in your phone.

   NOTE:
The infotainment system by default will be able to recognize the Bluetooth enabled devices around it.

2. Enable the Bluetooth visibility of the infotainment system so that even other devices with Bluetooth capabilities can now search and view the infotainment system. To enable or disable the visibility of the system:

   1. Tap . The system displays the Setup options.
   2. Navigate to and select the Phone Setup option.
      The system displays the various options for managing the Bluetooth capabilities of the system.
   3. In the Phone Setup options, navigate to and select Bluetooth Visibility. When set, the system will be
visible to other devices when they initiate a Bluetooth devices search. If the visibility is not enabled, the system will not be listed when other devices search for Bluetooth devices around them.

**NOTE:**

Once enabled, the Bluetooth visibility will be available only for 5 minutes.

---

PAIR DEVICES

Connecting your phone with the infotainment system is called as pairing. The TATA CONNECTNEXT® infotainment system supports a maximum of 10 paired devices. A device once paired need not be paired again unless the pairing is deleted. A phone with an existing pairing with the infotainment system will be automatically connected when Bluetooth is enabled in both the devices and the phone is within the range of the system.

To connect your Bluetooth enabled phone with the infotainment system:

1. In the Phone Setup options, navigate to and select **Pair New Device** option. The system searches for Bluetooth enabled devices within its range.
PAIR DEVICES

2. Navigate to and select the required phone from the list of currently available Bluetooth enabled devices.

NOTE:
If you tap the icon when the Bluetooth device search is in progress, the system stops the search and displays the Bluetooth options.

3. The system prompts you to confirm the Bluetooth pass key of the phone. Select Yes. The system initiates the pairing of the infotainment system and the selected phone. If the pairing is successful, the system displays the phone in the Paired Devices screen. A copy of your phone data like call logs (phone numbers and other contact details) is also created in the system.

NOTE:
When the pairing of a phone is initiated, the currently connected device(s) must be temporarily disconnected. The system will prompt you with a confirmation message for disconnecting the connected paired devices.
NOTE:
If the pairing is initiated from the phone, the system displays a message to accept or reject the pairing request along with a Bluetooth pin confirmation message. However, for initiating pairing from the phone, the ‘Device Visibility’ of the system must be enabled.

GUIDELINES FOR PAIRING DEVICES

Some of the guidelines for successfully pairing and connecting your phone with the infotainment system are:

- Ensure that Bluetooth feature is switched ON in your phone for successful pairing or auto-connection with your infotainment system.
- Ensure that the phone and the infotainment system are set to be visible to one another (refer to the Bluetooth setup settings of your phone and the infotainment system).
- Ensure that your phone is not in Battery Saver or Airplane mode.
- Ensure that the phone and infotainment system are close to each other (in range) and there are no obstructions blocking the phone and infotainment system connectivity.
- Ensure that your phone contacts do not have special characters or blanks before their name. If there are such contacts, please rename them.

TROUBLESHOOTING STEPS FOR PAIRING DEVICES

If you are unable to pair your phone with the infotainment system even after following the guidelines, try the following troubleshooting steps:

1. Refer to the user manual of your phone to verify whether all instructions for reset, connection and pairing have been followed.
2. Re-initiate Bluetooth pairing search or connection request either from the phone or the infotainment system. Pairing search enables faster pairing or connection between the devices.
3. If the above steps do not help, start the pairing process from the beginning.
4. If the pairing is still unsuccessful, try clearing the paired devices list from the Bluetooth settings of your phone and reset your phone, if required. Do the same on the infotainment system, if necessary.
PAIR DEVICES

If you are unable to pair the devices even after following the troubleshooting steps, any one of the following conditions might be true for your phone:

- Compatibility with 3rd party phones depends on the Bluetooth standards, Bluetooth versions, OS version and applications deployed on the phone by its manufacturer. So, the Bluetooth functions on your phone may not support pairing of devices or is not compatible with the infotainment system due to the differences in Bluetooth software versions.
- It is recommended that you update the firmware of your phone when you receive a message from the phone manufacturer prompting you to upgrade, as these upgrades are meant to provide the latest and a defect free software to you.
- Generally Bluetooth SIG certified phones are known to work reliably with the infotainment system. Please check if your phone complies with the Bluetooth standards.
MANAGE PAIRED DEVICES

The infotainment system allows you to:

- View the list of devices paired to it
- Connect to a paired device
- Disconnect a paired device
- Delete paired devices

VIEWING PAIRED DEVICES

To view the list of devices paired with the infotainment system:

1. In the Bluetooth options, navigate to and select **Paired Device List**. The system displays the list of devices that are paired with the system.

CONNECTING/DISCONNECTING A PAIRED DEVICE

You can connect to a paired device to access the media related data like music and/or phone related data like contacts and call log stored in the device. A device paired with the system is by default connected for both media and phone. However, at any given point of time you can use the device for only one function i.e either to access the media stored in the device or for phone related functions.
MANAGE PAIRED DEVICES

To connect or disconnect a paired device:

1. In the Paired Devices screen, select the required device. The system displays the connection/disconnection status for the device.

DELETING PAIRED DEVICES

You can either delete a paired device or all devices that are currently paired with the infotainment system.

Deleting All Paired Devices

To delete all paired device:

1. In the Paired Devices screen, tap Delete All option. The system prompts you to confirm the deletion of all paired devices.
2. Select Yes. The system deletes all devices paired with the infotainment system.

Deleting a Paired Device

To delete a paired device:

1. In the Paired Devices screen, the system displays the list of devices currently paired with the system.
2. Tap Delete icon beside device name. The system prompts you to confirm the deletion of the paired devices.
3. Select Yes. The system deletes the selected device that was paired with the infotainment system.

NOTE:

If the selected paired device is currently connected, the connection will be disconnected before deleting the device.
The infotainment system provides you with some advance phone functionalities like:

- Setting alert notifications for new SMS
- Configuring automatic SMS for rejected calls

### Setting Notifications for New SMS

When you receive a new SMS on your mobile phone, the system can notify you of the SMS. The notification can be a beep and popup or only a popup.

**To enable the SMS notification:**

1. Tap \( \text{Settings} \) The system displays the Setup menu options.
2. Navigate to and select the Phone Setup option. The system lists various options to handle the phone related advance features of the infotainment system.
3. In the Phone Setup options, navigate to and select **SMS Alert Notification**. The system displays the various SMS Alert Notification options.
4. Scroll to and select the required notification. The system sets the selected option for SMS notification and when you next receive a new SMS, you will be notified by the system accordingly.

**NOTE:**

If you select the Notify with Popup option, the system can also readout the new SMS to you. Refer to “Enable SMS Readout” section.
NOTE:
Support for this functionality is dependent on the capabilities supported by your phone. If your phone does not support notifications, this functionality may not work even after enabling.

CONFIGURING AUTOMATIC SMS FOR REJECTED CALLS

When you receive an incoming phone call, you can either accept or reject it. If you reject a call, you can send an automatic SMS to the caller. You can also configure the text of the SMS, which will be sent.

To configure the automatic SMS text:

1. In the Phone Setup options, navigate to and select Configure Auto SMS. The system displays the Configure Auto SMS screen with various SMS text options.
2. Navigate to and select the required SMS text from the options. The system selects the options icon of the selected SMS text and also sends the text as SMS when you reject an incoming call next time.

NOTE:
The first 3 SMS text messages in the list cannot be changed. However, you can configure the remaining text messages as per your requirement.
NOTE:
The SMS text message can be of maximum 120 characters i.e. 6 lines of message wherein one line of text accommodates 20 characters.

Figure 47: Configure Auto SMS Options
PHONE FUNCTIONS

When a mobile phone is paired and connected to the infotainment system, you can handle the following phone operations through the hands-free capability of the system:

- Automatically connect to the mobile phone
- View phone details
- View call log and contacts
- Make an outgoing call
- Accept/reject an incoming call
- Put a call on hold
- Handle two calls at a time
- Conduct a conference call
- Toggle between the Phone handset and the hands-free capability
- Listen to new SMS read out by the system

VIEWING PHONE DETAILS

From the infotainment system display screen, you can get details of your mobile phone like, battery, network strength and so on.

VIEWING CALL LOGS

You can view all calls, received or dialed from the infotainment system or missed when connected to the system, in the call log. The system displays up to 20 missed calls, 20 dialed calls and 20 received calls.

To view the call log:

1. In the Phone Browse screen, tap Call Logs. The system displays the details of up to 60 past calls in the Call Log screen.

⚠️ NOTE:

If no mobile phone is paired/connected to the system and the SWC phone button is pressed, a popup message indicating 'Phone is not connected' is displayed. You are prompted with the Phone Setup options screen to pair a new device.

⚠️ NOTE:

The system may require some time to display the list of calls and will display a message while it retrieves the call logs.
VIEWING CONTACTS

The infotainment system allows you to view up to 2500 contacts stored in your phone book.

To view the contacts:

1. In the Phone Browse screen, tap **Contacts**. The system displays the Contacts screen with the list of contacts stored in your phone book.

**NOTE:**

The system may require some time to display the list of contacts and will display a message while it retrieves the contact list.

**NOTE:**

Your phone must support PBAP (Phone Book Access Profile) to enable download and viewing of contacts from the system.

MAKING AN OUTGOING CALL

The infotainment system supports four different ways to make a phone call. They are:

- Dialing by selecting the phone number from the call log
- Dialing by selecting the phone number from the contacts
- Dialing the phone number manually using Dialpad
- Dialing by selecting the phone number from the Favourites
- Dialing using voice command.
PHONE FUNCTIONS

Manually Dialing a Phone Number

To make a call by manually dialing a phone number:

1. In the Phone Browse screen, select the Dialpad. The system displays the Keypad to enter the phone number.

2. Enter the digits of the phone number in the dialpad.

3. After entering the phone number, tap Call. The system initiates the outgoing call.

NOTE:
To delete an incorrect entry, use the × beside the typed number to delete the entire number or digits in the number. On tapping the icon, the system deletes one digit at a time starting with the last digit in the number.

NOTE:
The system retains the phone number that was last dialed in the dialpad. So, to redial the phone number, you can just open the dialpad and select the Call icon.

NOTE:
Refer to the “Viewing Call Logs” section for information on displaying the Phone Browse screen options.
Dialing Using the Contact

To make a call by dialing a number from the contacts:

1. Open the Contacts screen. Refer to the “Viewing Contacts” section for the steps to open the Contacts screen.
2. Navigate through the contacts and select the required number. The system dials the selected number and initiates the outgoing call.

**NOTE:**
The contact numbers that do not have a name defined for them will be displayed first in the Contact list with an #.

**NOTE:**
The contacts are by default arranged in an alphabetical order. When you browse through the contact list the alphabet group to which a contact belongs to is displayed and highlighted in the screen.
PHONE FUNCTIONS

Dialing Using the Call Log

To dial a number from the list of previous calls (call log):

1. Display the call log. Refer to the “Viewing Call Logs” section for information on displaying the call log.
2. Select the required number from the list. The system dials the selected number and initiates the outgoing call.

Dialing Using the Favourites

The infotainment system supports marking some contacts as favourites. The system also allows you to view and access these favorite contacts separately from the Favourites screen, in addition to the Contacts screen.
Marking a Contact as Favourite

To mark a contact as favorite:

1. In the Contacts screen, select the required contact and tap displayed beside the contact number. The system highlights the star icon and the contact is marked as favorite.

**NOTE:**
If a contact has more than one number, you can view all the numbers/details of the contact in the Internal Contact Details screen and then tap the star beside each number to add them to the favourites list or select the required number to dial.

Viewing the Favourites List

You can identify the contacts marked as favorite with the highlighted star in the Contacts screen. All favorite contacts can also be separately viewed in the Favourites screen.

To display the Favourites screen:

1. In the Phone Browse screen, tap **Favourites**. The system displays the Favourites screen with the list of favorite contacts.

**NOTE:**
If you have configured Favourites as a short cut menu then you can just tap the shortcut view the Favourites screen.
PHONE FUNCTIONS

Dialing a Favourite Number

To dial a favourite contact:

2. Open the Favourites screen. The system lists all contacts marked as favourite.
3. Navigate to the required favourite contact and tap Call. The system dials the number of the selected favorite contact and initiates the outgoing call.

ACCEPTING/REJECTING AN INCOMING PHONE CALL

When you receive a phone call, you can either accept or reject it using the infotainment system.

If your mobile phone is paired and currently connected to the system, the system notifies you with a popup message when you receive a phone call. The system allows you to Accept, Reject or Reject with Message the incoming call.

In the Reject with Message option, the system rejects the call and also sends a SMS to the caller with the configured text. Refer to “Configuring Automatic SMS for Rejected Calls” section for the steps to configure automatic SMS.

To accept the incoming call:

1. Select the Accept icon in the popup message. The system connects the call to enable you to talk to the caller.

   **NOTE:**
   
   You can also accept the call using the Steering Wheel control.

To reject the incoming call:

1. Select the Reject icon in the popup message. The system disconnects the call.

   **NOTE:**
   
   You can also reject the call using the Steering Wheel control.

To reject the incoming call and send a SMS to the caller:

2. Select the Reject with Message icon in the popup message. The system rejects the call and sends an SMS to the caller.
PHOTO FUNCTIONS

HANDLING IN-CALL FUNCTIONS

When you are in a call (outgoing or incoming), the system supports you to perform any of the following functions:

- Respond to the Interactive Voice Response (IVR) with the required details
- Put the call on hold
- Switch between phone (handset) and system (hands-free) capability
- Accept another incoming call
- Switch between calls
- Conduct a conference call by adding another number or by merging two existing calls
- Mute the microphone
- End the call

Responding to the IVR

When you have called a contact with Interactive Voice Response (IVR) like customer care number of bank and so on, you will have to enter some details through the phone. For
PHONE FUNCTIONS

example, you might have to enter your bank account number, when prompted by the IVR. You can use the dialpad in-call option to enter such details through the infotainment system.

To display the dialpad and to respond to the IVR with details:

1. In the active call screen, tap Dialpad and enter the details as prompted by the IVR.

Putting a Call on Hold

To put a call on hold:

1. In the active call screen, tap Hold. The system puts the currently active call on hold.

Switching Between Handset and Hands-Free

When in an active call, the system allows you to switch between the phone handset and its hands-free capability and vise versa.

To toggle between phone and system:

1. In the active call screen, tap Handset icon to switch the call from system to phone or Handsfree icon to switch from phone to system.

Figure 56: Active Call Keypad
NOTE:
Depending on the icon displayed on the screen, you can identify in which mode you are. If in Handset mode, the Handsfree icon will be displayed and in Handsfree mode, the Handset icon.

Accepting Another Incoming Call

When you are in an active call and receive another incoming call, you can put the active call on hold and accept the new call. The system allows you to have a maximum of 2 calls at any given time, one on hold and the other active.

To accept another incoming call:

1. In the active call screen, the system displays a new call popup message with Accept, Reject and Reject with Message icons, when you receive a new incoming call. Select Accept in the new call popup message. The system puts the first call on hold and activates the new call.

Switching Between Calls

When you have 2 calls simultaneously (one on hold and other active), the system allows you to switch between the calls without ending either of them.

To switch between calls:

1. In the active call screen, select Swap. The system puts the active call on hold and activates the second call, which was on hold till now. To activate the previous call, follow the same step.
PHONE FUNCTIONS

**Conducting a Conference Call**

When in an active call, you can connect an additional phone number to create a conference call between the contacts. You can create a conference call by either dialing to an additional number or by accepting a new incoming call.

To create a conference call by dialing additional number:

1. In the active call screen, tap **Add Call**. The system puts the active call on hold and displays the Contacts screen. You can dial the additional number from the contacts list or from the call log, the favourites list or dialpad.

2. Follow the steps listed in the “Making an Outgoing Call” section for dialing a number using the various options. The system initiates an outgoing call for the selected number.

3. In the new call screen, tap **Merge**. The system merges the 2 calls (one on hold and the new call) to create a conference call. The first call is activated before merging.

To create a conference call by accepting a new incoming call:

1. Accept a new incoming call as detailed in the “Accepting/Rejecting an Incoming Phone Call” section.

2. In the new call screen, tap **Merge**. The system merges the 2 calls (one on hold and the new call) to create a conference call. The first call is activated before merging.
PHONE FUNCTIONS

NOTE:

You can view the list of participants in a conference call by tapping the Participants icon.

Muting the Microphone

When in a call (both individual and conference), you can mute the microphone to disable the other participant(s) in the call from hearing you.

To mute the microphone,

1. In the active call screen, tap the mute microphone icon.

NOTE:

To unmute the microphone, repeat the above step again.

Ending a Call

To end an active call:

1. In the active call screen, tap End. The system disconnects the call.

NOTE:

You can also end the active call using the Steering Wheel control.

ENABLE SMS READOUT

While driving the vehicle, you will be unable to read a new received SMS. The infotainment system can solve this problem by reading out the SMS for you.
To enable the system to readout:

1. Ensure that you have selected Notify with Popup option for SMS Alert Notification. Refer to “Setting Notifications for New SMS” section. When you receive a new SMS, the system will display a popup message.
2. Select Read Out in the popup message. The system reads out the new SMS for you.

![Figure 60: New SMS Notification and Options]
INFOTAINMENT SYSTEM APPS

GENERAL INFORMATION

Two types of mobile apps are supported by the infotainment system.

- CONNECTNEXT® app Dependent Mobile Apps
- Independent Mobile Apps

For apps that are dependent on the CONNECTNEXT® app, it is mandatory to install this app in the smartphone for other compatible apps to function properly. The details about the compatible apps that works with the infotainment system is provided in the CONNECTNEXT® app.

⚠️ NOTE:

The apps compatibility will depend on the vehicle variant.

The independent apps like Android Auto and CarPlay are also supported by the infotainment system. The availability of the CONNECTNEXT® app is not mandatory for these apps.

CONNECTNEXT® App Key Features

The key features of the CONNECTNEXT® app are as given below:

- This app will display all compatible apps once mobile is connected with vehicle infotainment system.
- CONNECTNEXT® App displays all apps developed for working with infotainment system along with compatible apps.

⚠️ NOTE:

CONNECTNEXT® app and apps working with CONNECTNEXT® app are compatible to mobile with Android operating system only.

⚠️ NOTE:

Installation of CONNECTNEXT® app in the smartphone is mandatory for the functioning of the compatible apps with your vehicle.
NOTE:
Smartphone should be connected to infotainment system and Internet connectivity should be enabled in order to configure the CONNECTNEXT® app for the first time in the vehicle.

NOTE:
Not all mobiles with different operating system versions support app functionality reliably. There are mobiles in which app crashes/closes intermittently due to device specific implementations.
To install the CONNECTNEXT® app:

1. Open Google Playstore on your android based smartphone.
2. Search for the CONNECTNEXT app.
3. Download and install CONNECTNEXT app on your smartphone.

The CONNECTNEXT app Icon is displayed on your smartphone.

Figure 61: CONNECTNEXT® App Home Screen
CONFIGURING CONNECTNEXT® APP

To configure the CONNECTNEXT® app:

1. Ensure that you have at least one Google account configured in the smartphone.
2. Click the CONNECTNEXT® app icon in your smartphone home screen. The app is opened.
3. Connect smartphone with the vehicle infotainment system via Bluetooth or USB. The connection status symbol will turn as green after successful connection.

**NOTE:**

At the time of configuration of the CONNECTNEXT app, Internet connectivity must be available.

4. Click on the button with the Google icon.
5. If you are signing in to the CONNECTNEXT® app for the first time, you will be prompted to enter your name. The CONNECTNEXT® app Home screen will be displayed after successful sign in and configuration.

CONNECTNEXT® APP HOME SCREEN

There are three tabs displayed in the CONNECTNEXT® app Home Screen, All, Compatible and Installed.

- The All tab consists of the list of apps that work with the CONNECTNEXT® app.
- The Compatible tab consists of the list of apps that are compatible with the currently connected vehicle, after configuration.
- The Installed tab consists of the list of apps that are currently installed in the smartphone and compatible with the CONNECTNEXT® app.

**NOTE:**

If an app is compatible with the CONNECTNEXT® app and is currently not installed in your smartphone, you can install the app by just clicking on the app icon.
NOTE:
If an app is compatible with the CONNECTNEXT® app and is currently installed in your smartphone, you can launch the by clicking on the app icon from any of the tabs.

NOTE:
You can read short description of the app by clicking on the drop down icon provided along with app. You can also view the installation status and compatibility status of the app.

NOTE:
Actual screen of the app may slightly differ from the images shown.

CONNECTNEXT® APP USER PROFILE INFORMATION

You can view the following information related to your profile in the CONNECTNEXT® app:

- User Profile
  - Name
- Last Connected vehicle
  - Vehicle Identification Number (may depend on your vehicle variant)
  - Vehicle Name
There are multiple apps, which work with the CONNECTNEXT® app and can be used in the TATA Nexon vehicle. The list of supported apps will be displayed in the CONNECTNEXT® app Home screen. Depending on your requirement, you can install and use the required app.

As an example, the Juke-Car App is detailed in the next section.

**NOTE:**

Apps or phone projection features like Android Auto and CarPlay, which are independent of the CONNECTNEXT® app, will also work when you connect your smartphone to the infotainment system.

Android Auto is a projection technology app, which allows you to operate your Android smartphones from the vehicle infotainment system. You can use voice actions or the simple arrangement of Google Maps, Google Play Music and other important phone functions as cards to access the required functionalities, which minimize distraction while driving.

The Android Auto feature requires the installation of the Android Auto Mobile App, which can be downloaded from your smartphone Google Play Store.

**INSTALL ANDROID AUTO**

To install the Android Auto:

1. Open Play Store on your Android based smartphone.
2. Search and find the Android Auto application.
3. Tap the Android Auto icon. The app page is displayed.
4. Tap the **Install** button. The app is downloaded and installed on your smartphone.

If any of the following apps on your smartphone are of an older version, you will be unable to connect to the Android Auto app:

1. Play Music
INFOTAINMENT SYSTEM APPS

ANDROID AUTO

2. Maps
3. Chrome

When you try to open Android Auto, your smartphone will redirect you to the respective app screen for downloading and upgrading the app.

CONNECT ANDROID AUTO TO THE INFOTAINMENT SYSTEM

Before you connect the Android Auto app on your smartphone with the infotainment system, you need to perform the following ONE TIME configuration steps:

1. Ensure your vehicle is in the parked condition and the Park Brake is applied.
2. Open the Android Auto App.
3. Browse to the Settings option.
4. In Settings, select Phone Screen Settings and tap on Enable Bluetooth.
5. In Settings, select General -> Connected Cars and tap on Enable Add new cars to Android Auto.

NOTE:
Ensure you have enabled your Location in the Phone settings for using Android Auto Google Map navigation.

NOTE:
Android Auto settings can be accessed from your phone only. Refer to your phone for settings details.

NOTE:
For better usability of the Android Auto app, the Internet connectivity must be good.

To connect to the infotainment system and start the Android Auto:

1. Once the above listed Android Auto app configurations steps are completed, connect your smartphone to the infotainment system, through USB, using the original USB cable of your smartphone. On the successful establishment of the connection, the infotainment system projects/displays the Android Auto screen.
NOTE:
By default, Android Auto is configured in the infotainment system. Thereby, when you connect your Android Auto enabled smartphone with the infotainment system you will be prompted to select whether you would like to continue the phone connection for Android Auto.

NOTE:
If the connection with the infotainment system is lost, the app is disconnected and infotainment system displays the Home screen.

Using Android Auto, you can access the Google Maps, Google Play Music, communication functionalities (receives and make phone calls, receive and send messages and so on) of your smartphone through the infotainment system. Even in the infotainment system, you just need to provide voice actions to control these functionalities, without removing your hand from the steering wheel.

Any new message that you receive on your phone is displayed on the Home screen and readout to you. You can either reply to the SMS with a default message like “I am Driving”.

Figure 62: Android Auto Home Screen

You can use Google Assistant (voice recognition) so that your voice actions are recognized. To activate, tap the Mic icon (highlighted in the above figure) on the Android Auto Home screen.
**Android Auto**

**Note:**
Anytime during active Android auto session, you can also enable Google Assistant by doing a LP on the **3** Steering Wheel control element.

**Note:**
You can click the **2** icon to go to the Android Auto Home screen from any other Android Auto screens.

**Access Google Maps**

To access Google Maps and its navigation support features from Android Auto on the infotainment system:

1. Tap the **1** icon on the Android Auto Home screen on the infotainment system. The Google Maps screen is displayed. You can now initiate and use the various features of Google Maps from the infotainment system, as you handle it from your Android smartphone.

**Note:**
Ensure you have enabled your Location in the Phone settings. If the location is not enabled, you will be unable to use Android Auto Google Map navigation.

**Access Google Play Music**

To access Google Play Music and its other functions from Android Auto on the infotainment system:
1. Tap the icon on the Android Auto Home screen on the infotainment system. The Google Play Music screen is displayed. You can now hear to the tracks in your Google Play Music and also use the other functions of the feature from the infotainment system, as you handle it from your Android smartphone.

**HANDLE CALLS**

To handle calls or other communication related actions from Android Auto on the infotainment system:

1. Tap the icon on the Android Auto Home screen on the infotainment system. The Dialer screen is displayed. You can now make calls, receive calls or handle any other communication or other communication actions from the infotainment system, as you handle it from your Android smartphone.

**NOTE:**

SMS/Messages when received are only displayed and readout from the Home screen.
ACCESS OTHER ANDROID APPS

To access other Android apps that are installed on your smart phone through Android Auto on the infotainment system perform the following steps:

1. Tap the icon on the Android Auto Home screen on the infotainment system. A screen with All car apps and Return to Tata Motors options is displayed.

2. Tap the All car apps option. The All Car Apps screen is displayed, with the list of Android apps that are supported by Android Auto and installed in your smart phone. You can now select the required app and start using it from the infotainment system, as you handle it from your Android smartphone.

EXIT ANDROID AUTO

To exit Android Auto and return to the infotainment system:

1. Tap the icon on the Android Auto Home screen on the infotainment system. A screen with All car apps and Return to Tata Motors options is displayed.
2. Tap the Return to Tata Motors option, the system exists Android Auto and displays the infotainment system Home screen.
Figure 66: Android Auto All Car Apps Screen
CARPLAY

NOTE:
Applicable only for iPhones and only if available in the vehicle feature list.

CarPlay can be used to operate your iPhones directly from your vehicle infotainment system. You can use simple voice actions/commands to access and use Music, Messages and other important phone functions available in your iPhone, which helps in minimizing distraction while driving.

NOTE:
For more information on the apps supported visit: http://www.apple.com/ios/carplay/.

The CarPlay is an iOS feature, which is compatible with iPhone 5 and above versions. It is incompatible with iPods, iPads and earlier versions of iPhones.

General guidelines for seamless usage:
- Ensure that the latest iOS is installed on your iPhone.
- Use only original Apple or Apple certified Lightning connectors/cables to connect your iPhone to the USB port of the infotainment system. For more information refer to https://support.apple.com/en-in/HT204566.
- Check whether the firmware of the vehicle infotainment system is up-to-date.

DEFINITION:
CarPlay is an Apple’s projection technology, which works with iPhones and car infotainment systems.

CONNECT CARPLAY TO THE INFOTAINMENT SYSTEM

To enable CarPlay in your iPhone, perform the following steps:

1. In your iPhone, browse to the Settings option.
2. In Settings, select General -> Restrictions and swipe the bar beside CarPlay to enable it.
3. Connect your iPhone to the infotainment system, using the original Apple or Apple certified Lightning USB cable. On successful establishment of the
connection, the infotainment system displays a popup or highlights the Apple CarPlay menu, if in focus in the Home screen.

4. Tap on the popup/menu to launch the Apple CarPlay Home screen.

⚠️ NOTE:
If the connection with the infotainment system is lost, the app is disconnected and the infotainment system Home screen is displayed.

⚠️ NOTE:
The settings of Apple CarPlay can be accessed from your iPhone only. Refer to your phone for settings details.

Using Apple CarPlay, you can access the Music, Message, communication functionalities (receives and make phone calls and so on) of your iPhone through the infotainment system. In the infotainment system, in addition to using the touch screen, control elements and SWC controls, you can just provide voice actions to control these functionalities, without removing your hand from the steering wheel.

To activate Siri (voice recognition) so that your voice actions are recognized, tap and hold the Home icon (highlighted in the above figure) on the CarPlay Home screen. Once you are displayed with the waves, you can speak your voice action.

⚠️ NOTE:
You can also enable Siri by doing a SP/LP on the Steering Wheel control element.
CARPLAY

HANDLE CALLS, MESSAGES AND COMMUNICATION ACTIONS

To handle the various actions of your iPhone from CarPlay on the infotainment system:

1. To handle calls: Tap the Phone icon on the Apple CarPlay Home screen on the infotainment system. You can now make calls, receive calls and view contacts.
2. To handle messages: Tap the Messages icon. You can now read, send and reply to received messages or handle other communication actions from the infotainment system, as you handle it from your iPhone.
3. To handle Music: Tap the Music, Podcasts or Audiobooks icon. You can now access all your content from iTunes®, Music app or other available third-party audio apps.
4. To return to the infotainment system Home screen: Tap the Tata icon. The system closes Apple CarPlay and displays the system Home screen.

⚠️ NOTE:

The other features in CarPlay can be similarly accessed from your infotainment system.
When an Apple CarPlay session is active in the system and you access other system functions like, HVAC and Volume Control, the status of these functions will be displayed at the top of the Apple CarPlay screen.
The CONNECTNEXT® infotainment system supports handling and viewing of some vehicle feature/components controls. It allows you to:

- Set vehicle door locking options
- Manage the Park Assist system settings, if available
- Handle exterior approach lights

**NOTE:**
The above features are not standard in every vehicle variant. Features that are unavailable in the vehicle cannot be controlled using the infotainment system. Please refer to the Owner’s Manual of your vehicle or check with your vehicle dealer to confirm the list of features available in your vehicle.

Options to handle all these functions are available in the Vehicle Setup screen of the infotainment system.

**DISPLAY VEHICLE SETUP SCREEN**

To display the Vehicle Setup screen:

1. Tap the gear icon. The system displays the Setup menu options.
2. Navigate to and select the **Vehicle Setup** option. The system displays the Vehicle Setup screen with various options for handling the vehicle door lock/unlock, park assist and so on.

![Figure 73: Setup Screen](image-url)
SET VEHICLE AUTO RELOCK

In the Vehicle Setup screen, you can set the vehicle to auto relock itself after a specified time period.

**NOTE:**

For steps to display the Vehicle Setup screen, refer to the Display the Vehicle Setup Screen section.

**SETTING VEHICLE AUTO RELOCK**

**DEFINITION:**

With the Vehicle Auto Relock feature, when you unlock the vehicle through the remote key and none of the doors are opened for 60 seconds, the doors will be re-locked automatically, for safety purpose.

To set the Vehicle Auto Relock feature:

1. In the Vehicle Setup screen, navigate to and select the Vehicle Auto Relock option. The system selects the check box and enables the feature.

**NOTE:**

You can select the Vehicle Auto Relock option again to clear the check box and disable the feature.
MANAGE PARK ASSIST (IF APPLICABLE)

The Park Assist feature is vehicle dependent. If you have park assist system in your vehicle variant, you can manage it using the infotainment system. The system allows you to:

- Enable Park Assist Delay Timer
- Set park assist volume

⚠️ NOTE:
For steps to display the Vehicle Setup screen, refer to the Display the Vehicle Setup Screen section.

- Set park assist tone

⚠️ NOTE:
The Park Assist system of your car will be activated when you engage/disengage the Reverse gear.

⚠️ NOTE:
The Park Assist screen is also displayed when you tap on the Right Drawer.

MANAGING PARK ASSIST DISPLAY

The system displays the Park Assist screen when the Reverse gear is engaged. The display is stopped when the Reverse gear is disengaged.
The Park Assist display screen has the following information:

**Table 8: Park Assist Screen**

<table>
<thead>
<tr>
<th></th>
<th>Information Header</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Contains any one of the following details:</td>
</tr>
<tr>
<td></td>
<td>• Park Assist component related warning, for example, can contain a message to indicate that the Park brake is engaged</td>
</tr>
<tr>
<td></td>
<td>• Active phone call related information</td>
</tr>
<tr>
<td></td>
<td><strong>NOTE:</strong></td>
</tr>
<tr>
<td></td>
<td>The Phone call related information will be displayed only if the <strong>Mix with Audio</strong> option is enabled. Refer to the “<strong>Retaining Audio During Park Assist</strong>” section for more information.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th></th>
<th>Park Assist sensors field of view</th>
</tr>
</thead>
</table>

Figure 75: Park Assist Screen

Figure 76: Park Assist Screen with incoming call
MANAGE PARK ASSIST (IF APPLICABLE)

Unavailability of Park Assist Display

Sometimes even after activating park assist the component details are not displayed in the system. This will happen in the following situations:

1. A critical error has occurred in the Park Assist component and you need to contact the Tata service center
2. The Park Assist component is temporarily disabled because:
   1. A trailer is connected to your car
   2. Dust particles, water or other object is obstructing the sensors surface on bumper.

   ! NOTE:
   For more information on the Park Assist system refer to your vehicle user manual.

Delaying Park Assist Display Stop

The system allows you to retain the Park Assist display screen even after the Reverse gear is disengaged. This feature is called as Park Assist Delay Timer.

DEFINITION:

When in a closed parking lot, you have to disengage and engage the Reverse gear multiple times for parking your vehicle within the available space. The Park Assist Delay Timer feature, when enabled, will retain the park assist screen for a pre-configured time even when the Reverse gear is disengaged.

To enable the Park Assist Delay Timer:

1. In the Vehicle Setup screen, navigate to and select the Park Assist option. The system displays the Park Assist Setup screen.
2. In the Park Assist Setup screen, navigate to and select the Park Assist Delay Timer option. The system displays the options for the Park Assist delay timer.
3. Select the required timer option from 0 sec/5 sec/10 sec. When the Park Assist component is enabled next, the system retains the Park Assist display screen even after the Reverse gear is disengaged for the selected time period.
Setting Park Assist Volume

This option sets the volume related parameters of the vehicle Park Assist component.

To set the volume value for park assist:

1. In the Vehicle Setup screen, navigate to and select the Park Assist option. The system displays the Park Assist Setup screen.
2. In the Park Assist Setup screen, highlight Park Assist Volume field and modify the value of the field, by setting it to a new value in the range of 0 to 10.

Setting Park Assist Tone

This option sets the tone of the vehicle Park Assist component.

To set the tone for park assist:

1. In the Vehicle Setup screen, navigate to and select the Park Assist option. The system displays the Park Assist Setup screen.
MANAGE PARK ASSIST (IF APPLICABLE)

2. In the Park Assist Setup screen, highlight Park Assist Tone field and select the required tone from the list provided.

_Retaining Audio During Park Assist_

By default, the infotainment system stops the currently active media source, when the park assist feature is used. To retain the media source audio in the background even during park assist:

1. In the Vehicle Setup screen, navigate to and select the Park Assist option. The system displays the Park Assist Setup screen.
2. In the Park Assist Setup screen, navigate to and select the Mix With Audio option. The check box beside the option is selected and the system enables audio with park assist.
The Rear View Camera (RVC) feature is vehicle dependent. If you have a rear view camera installed in your vehicle variant, you will be able to manage it using the infotainment system.

**DEFINITION:**
Rear View Camera (RVC) is located on the rear of the vehicle to aid in backing up and to alleviate the rear blind spot with guided lines.

When you engage the reverse gear, the RVC feature is activated. The RVC feature displays Red, Green and Yellow color zones and Yellow colored line. These lines indicate the following:

- Yellow lines are reference lines.
- Red, Green and Yellow colored zones are to identify the degree of closeness to the obstacle from your vehicle bumper i.e.
  - Red - Very close
  - Yellow - Close

**NOTE:**
For more details on RVC, please refer to the vehicle owners manual.
MANAGE APPROACH LAMPS

The Approach Lamps feature is vehicle dependent. The infotainment system provides you the flexibility of handling the approach lamps of your vehicle:

MANAGING APPROACH LAMPS

**DEFINITION:**

When you approach your car in the dark, you can switch on the Approach Lamps (some exterior and interior lights of the vehicle) to identify your car as well as to find your way safely to it.

**NOTE:**

Refer to the owner’s manual of your vehicle to understand how to switch on the Approach Lamps.

The system allows you to set the time period for which the Approach lamps will be illuminated after you switch them ON.

To set the Approach lights illumination time period:

1. In the Vehicle Setup screen, navigate to and select the **Approach Lamps** option. The system displays the various illumination time period options.
2. Navigate to and select the required illumination time period option from 30 seconds/60 seconds/90 seconds.
OVERVIEW OF CLIMATE CONTROL

The Climate Control feature is vehicle dependent. The infotainment system displays the climate control related information in its HVAC screen, which is displayed at the right of the infotainment system screen.

MANAGING CLIMATE CONTROL. The Climate Control feature can be managed using any one of the following options:

- HVAC Drawer Options
- HVAC Control Elements on the Vehicle Dash Board

Using the HVAC Drawer Options
When you tap the HVAC drawer, it is expanded completely. The drawer now displays different Climate Control setting options like temperature, blower speed, ECON toggle switch and so, which are used for managing the Climate Control of your vehicle.

The details displayed in this drawer will vary with the 3 status of the Climate Control.
- **Climate Off**: Climate Off will be indicated and no other details will be displayed.
- **Normal Mode**: Climate On icon, currently set Blower Speed and temperature.
- **Auto Mode**: Climate On icon, AUTO icon and currently set temperature.

NOTE:
In all other screens, the HVAC drawer will be displayed in collapsed mode (reduced in size) and will display only three details such as AC mode, Climate ON/OFF and temperature status, Auto and temperature status when in Auto mode or Fan Speed and temperature status.

To change the HVAC settings from within the drawer, you can:
- Tap on an option for example, the Auto option to enable/disable it
- Tap on the arrow icons beside the option for example, the temperature option to increase or decrease the setting value.

For information on the various climate settings, refer to “HVAC Control Elements” section.
OVERVIEW OF CLIMATE CONTROL

If any HVAC settings are changed using the HVAC control elements, the changes will be displayed in the HVAC drawer for few seconds.

Figure 80: HVAC Drawer - Climate Control Settings

Climate Settings Change Messages

The system displays change messages in the HVAC Drawer (partial expanded mode or collapsed mode) when you change any of the climate settings like temperature/blower using the HVAC control elements. The system displays message when you:

- Switch ON/OFF Climate Control
- Switch ON/OFF the AC
- Increase/decrease the blower speed
- Increase/decrease the temperature
- Shift between air re-circulation options
- Change the air distribution (vent) mode
- Set Rear Defog ON/OFF
- Set Maximum Frost Defrost
- Set Economy or Automatic mode
VOICE ALERTS

The CONNECTNEXT® infotainment system is equipped with a Voice Alert system, which alerts or informs the condition or status of some critical components or actions performed in your vehicle.

The infotainment system plays all the alerts and you can also view them in the Notification Bar.

Some of the voice alerts provided by the vehicle are listed below:

<table>

</tr>
</tbody>
</table>

**Figure 86: City Drive Mode Info Screen**

**Figure 87: Sport Drive Mode Info Screen**
The CONNECTNEXT® infotainment system allows you to control your vehicle Radio, Handsfree Phone and all supported media source devices using voice commands.

To activate the voice recognition feature:

1. Tap Voice Command from the Home screen.
2. Press the Voice Activation button on the Steering Wheel control element.

The system mutes/pauses the currently played audio and plays a beep sound to indicate the activation of the voice recognition feature and displays the voice recognition Command screen.

**NOTE:**

The system will start recognizing your voice commands only after the beep. So, speak only after you hear the voice activation beep. If no command is spoken after the beep, the system will prompt you to say a command.
VEHICLE VOICE RECOGNITION FEATURE

For effective voice recognition, follow the below guidelines:

- Do not give long pauses (greater than 1 second) while speaking the words in a command. Speak the words of the command at a constant rate.
- Avoid varying your pitch and volume while speaking the commands. Speak clearly and loudly at a reasonable speed.

- Some of the Voice Recognition commands that are listed in the "Voice Recognition Commands" section.

NOTE:
The infotainment system also displays the voice recognition commands. You can select and view the required command details from the Command Categories by tapping .

- Ensure there is no noise disturbance when you speak the commands like, other passengers in the vehicle are talking or there is lot of wind noise. Disturbance from external sound sources may result in poor voice recognition.
- Always face forward while speaking your commands as the voice recognition quality is best in this orientation.
- There will be a temporary disturbance in the voice recognition accuracy, when the user speaking the voice command changes i.e. if you had initiated the voice recognition, and in the middle another user in the vehicle starts speaking out commands. This disturbance will be stopped when the system adopts to the voice of the new user after few voice command trails.
When similar sounding contact names/song names are spoken, the system will display a list of options matching the spoken name. You can choose the required option from the list by calling out the corresponding line number or touching the required option on the screen.

- Please speak the commands and names in a neutral English accent for best results.

**Scenarios for Ignoring Voice Recognition Activation**

During the following situations, the system ignores activation of voice recognition even on the Long Press of the Voice Activation button:

- When the reading of a media source device is in progress
- When you get an incoming call
- When you are dialing an outgoing call
- When a video playback is in progress
- When the contacts and call logs in your phone and system are being synchronized
- When a phone call is active

**Scenarios for Auto-Termination of A Voice Recognition Session**

When in a voice recognition session, performing the following actions will automatically terminate the session:

- Receiving an incoming call
- Dialing an outgoing call
- Plugging-in a media source device
- Pulling out the media source device, which you are currently handing through the voice recognition feature
- Calling out wrong commands

**Scenarios for Ending A Voice Recognition Session**

When voice recognition is active, you can end the session by:

- Doing a Long Press on the Voice Activation button
- Pressing any HK, including the keys on the steering wheel
- Touching the screen to perform an action, except for selecting an option from the list displayed as response to a voice recognition command
- Speaking the “Cancel” voice recognition command during the session
VOICE RECOGNITION FEATURE

Getting Voice Recognition Command Help

The system provides help to complete a command, when part of the command is recognized. The system plays an audio prompt to help you in completing the command.

The system also lists the different voice recognition commands.

To view the list and details of voice recognition commands:

1. In the Voice Recognition Command Screen, tap . The system displays the VR Help Screen.
2. In the VR Help screen, the system displays various categories of voice recognition commands.
3. Select the required category from the list. The voice recognition commands mapped to the selected category are listed.
4. Navigate to and select the required command. The description and syntax of the selected command are displayed.

FREQUENTLY ASKED QUESTIONS

Some frequently asked questions related to the features and functions of the CONNECTNEXT® infotainment system are listed below along with their answers.

1. I am playing the audio files in my Phone, connected through Bluetooth. However, I am unable to repeat tracks and play tracks in random. The Bluetooth connection is fine and all other media functionalities are working. Why am I facing this issue:

   Some of the Media functionalities are phone dependent and are supported only in phones with AVRCP version 1.3 and above. Please check the AVRCP version of your phone.

2. Why am I unable to fast forward or fast rewind music tracks when I play them from my phone?

   Please check if you have connected your Phone to the infotainment system through Bluetooth connection. If yes, check the AVRCP version of your Phone. As, some of the Media functionalities are phone dependent and are supported only in phones with AVRCP version 1.3 and above.

3. How to Play video in the infotainment system?

   Video Playback is available in “Browse” option of Media screen and select “Video” option. Through this you can browse through the Video files available in the current media source only (USB).

4. What are the video formats supported by the infotainment system?

   .avi and mp4 as container formats will be supported. H.264 (BP, MP and HP up to AVC Level 3.2), MPEG4 (SP, ASP) up to D1 Resolution (specifically 720 x 480 resolution only) (std NTSC/PAL) will be supported.

5. Can I play HD videos in the infotainment system?

   No. Videos only till 720 x 480 resolution (Std NTSC / PAL) will be supported.

6. How can I play video files from my phone?

   Connect your phone via USB port. After connection put your phone in USB Mass Storage Class mode. You should be able to browse through the contents of Phone via Infotainment system and will be able to play compatible video files. This behavior might vary
7. **From which Media sources can I play video?**
   
   You can play video only from USB.

8. **Can I See / Play audio / Video / pictures from my smartphone when connected through USB port?**
   
   Yes. However, you have to enable your phone in Mass Storage Class mode just after connection to Car USB port. This behavior might vary based on your smartphone.

9. **What are the supported video and audio codecs?**
   
   The supported video and audio codecs are as follows:
   
   - **Video Codecs:** H.264 (BP, MP and HP up to AVC Level 3.2), MPEG4 (Simple and Advanced Simple Profile - All Levels)
   - **Audio Codecs - Profile Supported:** MP3 Or MPEG-2 Audio Layer III, AAC (AAC-LC And HE-AAC), WMA, WAV
   - **Container File:** AVI, MP4

10. **I am unable to connect my Phone to the infotainment system using a USB cable however, I am able to connect through Bluetooth. Can you please help me with a solution?**

    The USB cable that you are using to connect the Phone with the infotainment system might not be compatible with your Phone. Please use only the USB cable provided by the Phone Manufacturer.

11. **I am unable to connect to Android Auto. I have followed all steps specified. What could be the cause of the problem?**

    If the connection between the Android Auto application and the infotainment system fails, this problem could arise. The connection will fail due to one of the following reasons:
    
    - Bluetooth connection was unsuccessful or connection was lost
    - If the infotainment system date and time does not match with the Phone data and time settings.

12. **How do I initiate/start Android Auto/CarPlay in the infotainment system?**

    Please refer to “Android Auto” and “CarPlay” sections for details.

13. **To use Android Auto/CarPlay, do we have any specific Smartphone/iPhone version requirements?**
FREQUENTLY ASKED QUESTIONS

For Android Auto the required specification is, Android smartphones with android version 5.0 or greater. For CarPlay the requirement is, iPhone 5 and above versions.

14. Can I use my phone while I have connected to the infotainment system for Android Auto and I am currently using its functionalities?
Yes, you can use your phone, while connected to the infotainment system for Android Auto and the application is currently in use.

15. Where can I get the list of apps that are compatible with Android Auto/CarPlay?
Apps compatible with Android Auto: From Android Auto Browse menu-> More Apps option.
Apps compatible with CarPlay: Listed on the CarPlay app Home screen.

16. How do I use Google Voice Recognition while Android Auto is connected and running on the infotainment system?
You can enable Google Assistant (voice recognition), so that your voice actions are recognized, using any one of the following ways:
- Tap the mic icon.

17. Can Android Auto and CarPlay be used simultaneously?
No, Android Auto and CarPlay cannot be used simultaneously from the infotainment system. You need to disconnect one app before connecting and using the other.

18. Can I use other functionalities of the infotainment system while connected for Android Auto/CarPlay?
Yes, you can use other functionalities of the infotainment system when connected for Android/ Auto/CarPlay. However, some of the functionalities like Bluetooth setup will be unavailable.

19. I want to change the music player of the Android Auto app. How can I do it?
The list of supported music players will be listed, when you select the Arrow icon displayed to the right of the Media icon, in the Android Auto screen. Select the required music player.
The abbreviation used in the guide are listed in the below table.
